Hsu, Tyler J. concussion rehabilitation and return to play and complications and post concussion sequelae The second and third sections discuss injuries to the cervical spine and the thoracolumbar spine respectively describing injury evaluation management and outcomes in the elite athlete Spine conditions have been studied extensively in the general population however applying this data to the elite athlete is controversial Numerous external variables make performance of well designed clinical trials challenging in this population and consequently evidence based recommendations are lacking for the athlete s spine Practical and engaging Spinal Conditions in the Athlete will be an excellent resource for sports medicine specialists orthopedic and neurosurgeons and any clinician treating the active patient *An Athlete's Guide to Agents, Fifth Edition* , **You Bet**
