Modular Programming of Adaptive CAX Manufacturing Process Chains (E-Book) Gunter Spöcker, 2016-11-07 The manufacturing industry is undergoing major changes due to current trends like mass customization and Industrie 4.0. However today's CAX systems and approaches are not suitable to handle adaptive CAX process chains. To overcome this situation and to close the gaps between the existing CAX environment and the requirements for the manufacturing of the future a modular approach based on extended function blocks is presented. The proposed approach is verified based on the use case of a worn out BLIR segment by using repair features.

Intelligent Robotics and Applications YongAn Huang, Hao Wu, Honghai Liu, Zhouping Yin, 2017-08-04 The three volume set LNAI 10462, LNAI 10463 and LNAI 10464 constitutes the refereed proceedings of the 10th International Conference on Intelligent Robotics and Applications ICIRA 2017 held in Wuhan, China, in August 2017. The 235 papers presented in the three volumes were carefully reviewed and selected from 310 submissions. The papers in this second volume of the set are organized in topical sections on industrial robot and robot manufacturing mechanism and parallel robotics machine and robot vision robot grasping and control.

Vehicle and Automotive Engineering Károly Jármai, Betti Bolló, 2017-03-23 This book presents the proceedings of the first vehicle engineering and vehicle industry conference. It captures the outcome of theoretical and practical studies as well as the future development trends in a wide field of automotive research. The themes of the conference include design, manufacturing, economic and educational topics.

Advances in Manufacturing Technology XXXI Simeon Keates, 2017-08-15 The urgent need to keep pace with the accelerating globalization of manufacturing in the 21st century has produced rapid advances in manufacturing research, development and innovation. This book presents the proceedings of the 15th International Conference on Manufacturing Research ICMR 2017 which also incorporated the 32nd National Conference on Manufacturing Research NCMR and was held at the University of Greenwich, London, UK, in September 2017. The conference brings together a broad community of researchers who share the common goal of developing and managing the technologies and operations key to sustaining the success of manufacturing businesses. The book is divided into 13 parts covering topics such as advanced manufacturing technologies including additive, ultra precision and nano manufacturing; manufacturing systems; digital and cyber physical systems; product design and development including lifecycle management and supply chain collaboration; information and communication including innovation and knowledge management; and manufacturing management including lean, sustainable and cost engineering. With its comprehensive overview of current developments, this book will be of interest to all those involved in manufacturing today.

Machine Tools Production Systems 3 Christian Brecher, Manfred Weck, 2021-12-13 The first part of this third volume focuses on the design of mechatronic components, in particular the feed drives of machine tools used to generate highly dynamic drive movements. Engineering guides for the selection and design of important machine components, the control technology of feed drives and the

measuring systems required for position capture are presented Another focus is on process and diagnostic equipment for manufacturing machines and systems The second part describes control concepts including programming methods for various applications of modern production systems Programmable logic controllers PLC numerical controllers NC and robot controllers RC are part of these presentations In the context of automated manufacturing systems the various levels of the automation pyramid and the importance of control systems are also outlined Finally the volume deals with the engineering of machines and plants The German Machine Tools and Production Systems Compendium has been completely revised The previous five volume series has been condensed into three volumes in the new ninth edition with colored technical illustrations throughout This first English edition is a translation of the German ninth edition *Business India* ,2002
