Too Hot to Handle Frank Close,2014-07-14 Frank Close a leading physicist and talented popular science writer reveals the true story of the cold fusion controversy a story ignored until now in spite of the glare of publicity surrounding Martin Fleischmann and Stanley Pons On March 23 1989 these two Utah scientists held an astonishing press conference maintaining that they had succeeded working in secret in harnessing atomic fusion What was the basis for their claims to have achieved cold fusion in a test tube in a basement laboratory while other scientists using magnets as big as houses and temperatures hotter than those in the center of the sun were failing to produce as much power as they were using Why did Fleischmann and Pons proclaim their discovery at a news conference when first announcements of scientific results are almost always made within the scientific community Why did the full blown media event inspired by their initial report cause governments to reorient their research programs in hopes of cornering the new technology And why did some scientists recklessly abandon their traditional painstaking methods in haste to be first to prove or discredit the experiment Acquainted at first hand with investigations of cold fusion on two continents Close is uniquely qualified to probe the motivations behind Fleischmann s and Pons s startling assertions and to explore the intellectual and political turmoil that surrounded the cold fusion debate Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Too Hot to Handle Jonathan Zimmerman, 2015-02-22 The first comprehensive history of sex education around the world Too Hot to Handle is the first truly international history of sex education As Jonathan Zimmerman shows the controversial subject began in the West and spread steadily around the world over the past century As people crossed borders however they joined hands to block sex education from most of their classrooms Examining key players who supported and opposed the sex education movement Zimmerman takes a close look at one of the most debated and divisive hallmarks of modern schooling In the early 1900s the United States pioneered sex education to protect citizens from venereal disease But the American approach came under fire after World War II from European countries which valued individual rights and pleasures over social goals and outcomes In the so called Third World sex education developed in response to the deadly crisis of HIV/AIDS By the early 2000s nearly every country in the world addressed sex in its official school curriculum Still Zimmerman demonstrates that sex education never won a sustained foothold parents and religious leaders rejected the subject as an intrusion on their authority while teachers and principals worried that it would undermine their own tenuous powers Despite the overall liberalization of sexual attitudes opposition to sex education increased as the century unfolded Into the present it remains a subject without a home Too Hot to Handle presents the stormy development and dilemmas of school based sex education in the modern world
