History in the Age of Abundance? Ian Milligan, 2019-03-28 Believe it or not the 1990s are history As historians turn to study this period and beyond they will encounter a historical record that is radically different from what has ever existed before Old websites social media blogs photographs and videos are all part of the massive quantities of digital information that technologists librarians archivists and organizations such as the Internet Archive have been collecting for the past three decades In *History in the Age of Abundance* Ian Milligan argues that web based historical sources and their archives present extraordinary opportunities as well as daunting technical and ethical challenges for historians Through case studies he outlines the approaches methods tools and search functions that can help a historian turn web documents into historical sources He also considers the implications of the size and scale of digital sources which amount to more information than historians have ever had at their fingertips and many of which are by and about people who have traditionally been absent from the historical record Scrutinizing the concept of the web and the mechanics of its archives Milligan explains how these new media challenge reshape and enrich both the historical profession and the historical record A wake up call for historians of the twenty first century *History in the Age of Abundance* is an essential introduction to the way web archives work what possibilities they open up what risks they entail and what the shift to digital information means for historians their professional training and organization and society as a whole

[PRICAI 2010: Trends in Artificial Intelligence](#) Byoung-Tak Zhang, 2010-08-24 Annotation This volume constitutes the refereed proceedings of the 11th Pacific Rim Conference on Artificial Intelligence PRICAI 2010 held in Daegu Korea in August September 2010 The 48 revised full papers presented together with 21 short papers in this volume were carefully reviewed and selected from 191 submissions The volume concentrates on AI theories technologies and their applications in the areas of social and economic importance for countries in the Pacific Rim

Free and Easy Website Design for Museums and Historic Sites Kelsey J. S. Ransick, 2015-12-16 Museums and historic sites faced with small budgets and staff can find it intimidating to redesign or create a website from scratch Concerns over resources make coding and designing or hiring someone to do so daunting and expensive It does not have to be so Content creation is inescapable when making a website but designing and constructing a unique website can be

as simple as taking an afternoon to use a color chart to pick a color scheme and paste in text from a Word document All of the tools discussed in the book are free at the base level and some offer upgrade packages with even more features The advice and techniques are all created with an eye to making websites work for smaller institutions with limited budgets and timeframes Every museum professional has come across issues when adapting general software for an institution's specific needs and the information in this book will anticipate some of these needs by offering easy-to-implement workarounds and information on related software or services that integrate with each website Features include How-to guides for Wix Weebly WordPress and Google Sites Detailed comparisons of WYSIWYG What You See Is What You Get editors by cost features and ease of use so that you can easily identify which platforms meet your needs Mythbusting of common website and computer assumptions Step-by-step content and design planning guide Basic HTML coding tricks and tips for the slightly more advanced users or those who want to become so A free companion Web site includes links to online resources ongoing updates to this book to keep it current and links to other free online tools and software Go to <https://freethemuseum.wixsite.com/aaslh> to request access on this author created and managed companion site

Visual Leap Jesse Berg, 2016-10-04 Visual Leap is a how-to book for teachers students and parents interested in making learning easier In step by step fashion it presents an effective universal visual method to teach students how to think independently and critically and how to organize their ideas for any instructional purpose The visual strategies are rooted in the science of human learning and are effective because they tap into the ways that we learn naturally The Visual Leap method simplifies teaching the skills of the Common Core State Standards and gives teachers explicit ways to differentiate instruction to meet the needs of all learners The strategies work across many grade levels and subject areas and for a wide variety of instructional objectives across the curriculum such as vocabulary acquisition reading comprehension writing speaking and listening Visual Leap offers easy ways to foster dynamic creative and critical thinking in the classroom and provides teachers and students with a toolkit of problem solving and learning strategies designed to serve them throughout their academic and professional lives
