Urban African American:

African American Urban Experience Earl Lewis, Tera W. Hunter, 2004 **River Jordan** Joe William

Trotter, 1998-03-19 Since the nineteenth century the Ohio River has represented a great divide for African Americans. It provided a passage to freedom along the underground railroad and during the industrial age it was a boundary between the Jim Crow South and the urban North. The Ohio became known as the River Jordan, symbolizing the path to the promised land. In the urban centers of Pittsburgh, Cincinnati, Louisville, and Evansville, blacks faced racial hostility from outside their immediate neighborhoods as well as class, color, and cultural fragmentation among themselves. Yet despite these pressures, African Americans were able to create vibrant new communities as former agricultural workers transformed themselves into a new urban working class. Unlike most studies of black urban life, Trotter's work considers several cities and compares their economic conditions, demographic makeup, and political and cultural conditions. Beginning with the arrival of the first blacks in the Ohio Valley, Trotter traces the development of African American urban centers through the civil rights movement and the developments of recent years.

Social Work Practice with African Americans in Urban Environments Rhonda Wells-Wilbon, 2015-09-08 The experiences of African Americans in urban communities are distinct from those of other ethnic groups and to be truly understood require an in-depth appreciation of the interface between micro and macro level factors. This sweeping text, an outgrowth of a groundbreaking urban social work curriculum, focuses exclusively on the African American experience through field education, community engagement, and practice. It presents a framework for urban social work practice that encompasses a deep understanding of the challenges faced by this community. From a perspective based on empowerment, strengths, resilience, cultural competence, and multiculturalism, the book delivers proven strategies for social work practice with the urban African American population. It facilitates the development of creative thinking skills and the ability to meet people where they are, skills that are often necessary for true transformation to take root. The book describes an overarching framework for understanding and practicing urban social work, including definitions and theories that have critical implications for working with people in such communities. It encompasses the contributions of African American pioneers regarding a response to such challenges as poverty, oppression, and racism. Focusing on the theory, practice, and policy aspects of urban social work, the book examines specific subsets of the urban African American population, including children, adults, families, and older adults. It addresses the challenges of urban social work in relation to public health, health, and mental health, substance abuse, criminal justice, and violence prevention. Additionally, the book discusses how to navigate the urban built environment and the intersection between African Americans and other diverse groups. Chapters include outcome measures of effectiveness, case studies, review questions, suggested activities, and supplemental readings.

Trotter, E. Lewis, T. Hunter, 2004-03-17 From the early years of the African slave trade to America blacks have lived and laboured in urban environments Yet the transformation of rural blacks into a predominantly urban people is a relatively recent phenomenon only during World War One did African Americans move into cities in large numbers and only during World War Two did more blacks reside in cities than in the countryside By the early 1970s blacks had not only made the transition from rural to urban settings but were almost evenly distributed between the cities of the North and the West on the one hand and the South on the other In their quest for full citizenship rights economic democracy and release from an oppressive rural past black southerners turned to urban migration and employment in the nation s industrial sector as a new Promised Land or Flight from Egypt In order to illuminate these transformations in African American urban life this book brings together urban history contemporary social cultural and policy research and comparative perspectives on race ethnicity and nationality within and across national boundaries African American Urban History since World War II Kenneth L. Kusmer, Joe W. Trotter, 2009-08-01 Historians have devoted surprisingly little attention to African American urban history of the postwar period especially compared with earlier decades Correcting this imbalance African American Urban History since World War II features an exciting mix of seasoned scholars and fresh new voices whose combined efforts provide the first comprehensive assessment of this important subject The first of this volume s five groundbreaking sections focuses on black migration and Latino immigration examining tensions and alliances that emerged between African Americans and other groups Exploring the challenges of residential segregation and deindustrialization later sections tackle such topics as the real estate industry s discriminatory practices the movement of middle class blacks to the suburbs and the influence of black urban activists on national employment and social welfare policies Another group of contributors examines these themes through the lens of gender chronicling deindustrialization s disproportionate impact on women and women s leading roles in movements for social change

Moeser,2014-07-15 A ground breaking collaborative study merging perspectives from history political science and urban planning The Separate City is a trenchant analysis of the development of the African American community in the urban South While similar in some respects to the racially defined ghettos of the North the districts in which southern blacks lived from the pre World War II era to the mid 1960s differed markedly from those of their northern counterparts The African American

community in the South was and to some extent still is a physically expansive distinct and socially heterogeneous zone within the larger metropolis. It found itself functioning both politically and economically as a separate city, a city set apart from its predominantly white counterpart. Within the separate city itself, internal conflicts reflected a structural divide between an empowered black middle class and a larger group comprising the working class and the disadvantaged. Even with these conflicts, the South's new black leadership gained political control in many cities, but it could not overcome the economic forces shaping the metropolis. The persistence of a separate city admitted to the profound ineffectiveness of decades of struggle to eliminate the racial barriers with which southern urban leaders indeed all urban America continue to grapple today.

Urban Planning and the African-American Community June Manning Thomas, 1997. Clarifying the historical connections between the African American population in the United States and the urban planning profession, this book suggests means by which cooperation and justice may be increased. Chapters examine the racial origins of zoning in US cities, how Eurocentric family models have shaped planning processes of cities such as Los Angeles, and diversifying planning education in order to advance the profession. There is also a chapter of excerpts from court cases and government reports that have shaped or reflected the racial aspects of urban planning.

The Evolution of American Urban Society Howard P. Chudacoff, Judith Smith, Peter Baldwin, 2016-05-23. This interesting and informative book shows how different groups of urban residents with different social, economic, and political power cope with the urban environment, struggle to make a living, participate in communal institutions, and influence the direction of cities and urban life. An absorbing book.

The Evolution of American Urban Society surveys the dynamics of American urbanization from the sixteenth century to the present, skillfully blending historical perspectives on society, economics, politics, and policy, and focusing on the ways in which diverse peoples have inhabited and interacted in cities. Key topics: Broad coverage includes the Colonial Age, commercialization, and urban expansion; life in the walking city; industrialization; newcomers; city politics; the social and physical environment; the 1920s and 1930s; the growth of suburbanization; and the future of modern cities.

Market: An interesting and necessary read for anyone involved in urban sociology, including urban planners, city managers, and those in the urban political arena.

School Counseling for Black Male Student Success in 21st Century Urban Schools Malik S. Henfield, Ahmad R. Washington, 2015-11-01. Discussions and research related to the salience of Black male student needs and development in relation to their general success and well-being is well documented in many fields. Indeed, many studies have found that healthy masculine identity development is associated with a number of positive outcomes for males in general, including Black males. In school counseling literature, however, this discussion has been relatively absent, particularly regarding those

students living in urban contexts Indeed research devoted to the study of Black males in the school counseling literature focuses almost exclusively on race and issues associated with its social construction with only cursory if any attention given to their masculine identity development as a function of living in urban communities and attending urban schools Based on this lack of information it is probably a safe assumption that intentional systematic culturally relevant efforts to assist Black males in developing healthy achievement and masculine identities based on their unique personal social academic experiences and future career goals are not being applied by school counselors concerned with meeting students needs School counselors are in a unique position nonetheless to lend their considerable expertise insights training and skills to improving life outcomes among Black males a population who are consistently in positions of risk according to a number of quality of life indicators Without knowledge and awareness of Black males masculine identity development in urban areas coupled with the requisite skills to influence the myriad factors that enhance and impede healthy development in such environments they are missing out on tremendous opportunities which other professions appear to understand and quite frankly seem to take more seriously As such this book proposes to accomplish two specific goals 1 Highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends 2 Encourage school counselors to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender The first rationale for this book then is to highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends e g standards based accountability practices in urban environments However I recognize the role of school counselors has never been fully integrated into educational reform programs As such their positions are often unregulated and determined by people in positions of power who do not understand their training job specific standards and thus potential impact on the lives of Black male students As a result their vast potential to develop strong interventions designed to address the myriad racial and masculine factors that serve to enhance and impede Black males academic achievement is often unrealized Therefore the second reason for this special issue is to include the scholarship of professional school counselors and counselor educators with policy change in mind Scholars will be invited to contribute manuscripts that explore race masculinity and academic achievement in relation to the role of school counselors This is designed to encourage school counselors and counselor educators to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender Gender Roles Janice W. Lee, 2005 Gender encompasses biological sex but extends beyond it to the socially prescribed roles deemed appropriate for each sex by the culture in which we live The gender roles we each carry out are highly individualistic built on our biological and physical traits appearance and personality life experiences such as childhood career and education and history of sexual

and romantic interactions Each element influences perceptions and expectations Gender related experiences influence and shape the ways we think about others and ourselves including self image behaviour mood social advancement and coping strategies This new book brings together leading international research devoted to this subject African-American Adolescents in the Urban Community Judith Rozie-Battle,2013-12-02 Become a more effective social worker with this outstanding volume on inner city urban youth African American Adolescents in the Urban Community Social Services Policy and Practice Interventions examines contemporary issues confronting African American youth It highlights key areas such as health education the criminal justice system and youth development strategies An essential overview of the status of urban African American youth for students professionals working with this important population and policymakers this vital book proposes policy and programming considerations for today and for the future African American Adolescents in the Urban Community is a one stop view of ways to help African American youth experience responsibility and community involvement health concerns of this population including teen pregnancy alcohol and drug addiction and limited access to health care the challenges that lie ahead for African American girls including crime poverty poor self esteem and peer pressure ways to help teenage fathers meet their financial and emotional obligations to their families police and prosecutorial policies that need to be examined and challenged to end the perception of a racially unjust system and much more
