It not only offers a comprehensive elaboration of the subject but also presents it from the points of view of states directly engaged in the conflict. For the authors in this book include researchers from many European countries albeit first and foremost from both Ukraine and Russia. In this way the collected work represents a contribution of undoubted value where the ongoing international debate on the Crimean annexation is concerned. From the review by Prof Anna Wyrozumska This book offers an interesting holistic and competent contribution to legal analysis surrounding Russia's annexation of Crimea the consequences thereof and the responsibility in international law therefor. It is characterised by a high level of legal analysis by a competent international team of authors led by Polish experts on the subject whose painstaking selection of co-authors has allowed for an airing of both Ukrainian and Russian standpoints. This work is the first to take a comprehensive look at the history of immigration policy in the United States through the prism of visual culture. Including many previously unpublished images and taking a new look at Lewis Hine's photographs Anna Pegler Gordon considers the role and uses of visual documentation at Angel Island for Chinese immigrants at Ellis Island for European immigrants and on the U.S. Mexico border. Including fascinating close visual analysis and detailed histories of immigrants in addition to the perspectives of officials this richly illustrated book traces how visual regulations became central in the early development of U.S. immigration policy and in the introduction of racial immigration restrictions. In so doing it provides the historical context for understanding more recent developments in immigration policy and at the same time sheds new light on the cultural history of American photography.
