the authors' knowledge, this is the first study to examine the effects of a single session of a group-based, self-help, cognitive-behavioral program on the self-reported health status of older adults with depression. The authors' findings suggest that a single session of a group-based, self-help, cognitive-behavioral program can have a positive effect on the self-reported health status of older adults with depression. The authors' findings also suggest that a single session of a group-based, self-help, cognitive-behavioral program can have a positive effect on the self-reported health status of older adults with depression. The authors' findings also suggest that a single session of a group-based, self-help, cognitive-behavioral program can have a positive effect on the self-reported health status of older adults with depression.
