Looking at modern industrial products one can recognize a variety of different complex shapes All these products are not only designed they are styled Everybody knows about the importance of styling if the product is a car but today even simple consumer appliances do not only have to fulfil their function they must also look nice In addition even purely technical products like turbines or valves are designed with very complex shapes to make them work more efficiently Thus optimising the shape of products is one of the key factors in the process chain of development Today there are various CAX systems which have evolved to be the basic tools for design calculation simulation and manufacturing in almost all kinds of industrial environments but the improvement of the product s shape is in most cases done manually on the physical model This break in the CAD information flow can be overcome with
