

Friendships of Adolescence

HEATHER KOHLER FLYNN
Sonoma State University, USA

It takes a great deal of bravery to stand up to our enemies, but just as much to stand up to our friends. (Rowling, 1999: 306)

Friendship is a critical relationship throughout the life course. Adolescence marks the period when peer interaction increases in depth and sophistication. Friendship is generally defined as a voluntary, dyadic relationship between two individuals that includes a reciprocal companionship where peers engage in mutual shared activities. A distinct feature that sets friendship apart from other relationships is that this bond is typically egalitarian in nature, unlike those with parents and sibling(s). In some cases, friends are chosen because they are dominant figures and/or role models. Close friendships during the teen years are particularly formative because they provide the context for learning the intimate relationship skills necessary to establish ties with people outside of the family.

Adolescence is a time of cognitive growth and increased independence and autonomy from parents. Close friendships become increasingly significant and involve more intimacy than past associations (Buhrmester, 1990; Crosnoe, 2000). Parental support remains relevant throughout adolescence (Bagwell and Schmidt, 2013; Flynn, Feinlee, and Conger, 2017; Way, 2013); however, youth spend more time with their friends and seek peer validation and advice now more than previously in their childhood (Bagwell and Schmidt, 2013; Buhrmester, 1990; Way, 2013). Social support from friends has significant and positive effects on well-being, including life satisfaction, happiness, self-esteem, and coping with stress. Friendship provides a buffer against bullying and victimization from other peers.

Adolescents without friends are vulnerable to loneliness, depression, and anxiety. They are more likely to drop out of school, commit suicide, become teen parents or gang members, and use drugs (e.g., see Faris and Feinlee, 2011; Lanza, Calkessen, and Bukowski 2013).

Features of Friendship

Similarity is a powerful predictor of adolescent friendship formation. Evidence indicates that individuals are more likely to become friends with those who are like them in demographic factors such as ethnicity, religion, and family background. Adolescent friends are comparable in physical attractiveness and social status levels. Teens choose friends who are similar in both prosocial and antisocial tendencies such as drug and alcohol use and delinquency. In other words, youth who use drugs choose friends who also use drugs.

Same-Sex

Gender differences exist in adolescent friendships. Adolescent girls express more positive feelings within their friendships and have higher levels of friendship quality compared with adolescent boys. Boys tend to define friendship based on shared activities and status, whereas girls characterize friendship in more intimate and expressive terms, such as emotional discussions. However, younger and early adolescent boys also value intimate, close friendships. As teen boys reach later adolescence, they become increasingly distrustful and less connected (see Way, 2013). Gender socialization theory suggests expectations for behavior and norms shape interaction and identity such that girls are encouraged to value interconnectedness and co-operation more highly than boys and that youth reinforce and reconstruct gender stereotypes in their peer friendships. These gender stereotypes shape perceptions of acceptable behavior, particularly for boys in later

Value Of Friendship Research Paper:

Analysis of Images, Social Networks and Texts Dmitry I. Ignatov, Michael Khachay, Andrey Kutuzov, Habet Madoyan, Ilya Makarov, Irina Nikishina, Alexander Panchenko, Maxim Panov, Panos M. Pardalos, Andrey V. Savchenko, Evgenii Tsymbalov, Elena Tutubalina, Sergey Zagoruyko, 2024-03-19 This book constitutes revised selected papers from the thoroughly refereed proceedings of the 11th International Conference on Analysis of Images Social Networks and Texts AIST 2023 held in Yerevan Armenia during September 28 30 2023 The 24 full papers included in this book were carefully reviewed and selected from 93 submissions They were organized in topical sections as follows natural language processing computer vision data analysis and machine learning network analysis and theoretical machine learning and optimization The book also contains one invited talk in full paper length

Friendship for Virtue Kristján Kristjánsson, 2022-09-01 Through its revised and applied Aristotelianism this book illuminates our understanding of friendship in moral philosophy moral psychology and moral education Friendship for Virtue has four main aims The first is to give the virtue of friendship the pride of place it deserves in contemporary Aristotle inspired virtue ethics The second is to integrate Aristotelian theory with recent social scientific research on friendship through mutual adjustments The third is to retrieve Aristotelian friendship as a moral educational concept where friendship for virtue is to be understood as friendship for virtue development The fourth is to offer a more detailed and realistic account than Aristotle did of why even the best of friendships can go stale and dissolve and why the human relationships they represent are so precarious for example in circumstances where erotic love and friendship clash

Global Trends in Teaching English Language and Literature. Dr. J. M. Shobha, T. Anbu, 2023-12-08 With great pleasure and enthusiasm I welcome you to this edition of the research articles on Global Trends in Teaching and Learning English Language and Literature As we all understand change is an unchanging reality embracing change and staying updated with the latest trends in teaching and learning is crucial for continuous improvement and enhancement in the field of education In these pages you will find a collection of insightful articles and research findings from esteemed authors and experts in their respective fields I hope that the content presented here enriches your knowledge and sparks new ideas May the discussions and collaborations over the topic inspire us to elevate the standards of teaching and learning ensuring a brighter future for English language education I extend my heartfelt gratitude to the authors for their valuable contributions Together we have crafted a volume that adds significant depth to our understanding of the evolving trends in language education

Moral Emotion, Moral Cognition, and (Im)Moral Behavior in the Workplace Peixu He, Hongdan Zhao, Cuiling Jiang, Chuangang Shen, 2023-09-27 Moral behavior is subject to socially accepted moral norms and also has a pervasive influence on organizational performance With the emergence of ethical issues found in organizations practitioners and scholars pay increasing attention to ethics management Therefore workplace moral behavior e g pro social behavior and organizational citizenship behavior OCB and immoral behavior e g interpersonal abusive behavior deviant counterproductive

behavior and unethical pro organizational behavior have also received substantial research interests over the past decades. To date the most common framework used to study moral behavior has been the cognitive approach with abundant evidence demonstrating that emotion and cognition are the two core elements in generating and influencing workplace immoral behavior. However, limited studies have been conducted to explore the emotional cognitive processes or integrative moral emotion cognition system relevant to workplace moral behavior. Despite our knowledge of the antecedents and consequences of workplace immoral behaviors, more research on the generating mechanism influencing mechanism transformation mechanism and governance strategies is needed. For example, it is unclear how exhibiting immoral behavior in the workplace would impact the actor's and the third party observer's emotions, thoughts, feelings, and subsequent behavior. Besides the question of whether ethical/unethical leader behavior would trigger a trickle-down effect, is underdeveloped, which refers to the fact that how the behavior or perception of the top leaders affects employees from top to bottom along the formal vertical power chain. In addition, we have little knowledge on when, how, and why the ethical employees, the so-called good soldiers, would engage in workplace immoral behavior and vice versa.

Resources in Education, 2000-04 *Handbook of Research on K-12 Blended and Virtual Learning Through the i²Flex Classroom Model* Avgerinou, Maria D., Pelonis, Peggy, 2021-03-05

Teaching models that focus on blended and virtual learning have become important during the past year and have become integral for the continuance of learning. The i²Flex classroom model, a variation of blended learning, allows non-interactive teaching activities to take place without teachers' direct involvement, freeing up time for more meaningful teacher-student and student-student interactions. There is evidence that i²Flex leads to increased student engagement and motivation as well as better exploitation of teachers and classroom time, leading to the development of higher-order cognitive skills as well as study skills for students' future needs related to citizenship, college, and careers. The *Handbook of Research on K-12 Blended and Virtual Learning Through the i²Flex Classroom Model* focuses not only on how to design, deliver, and evaluate courses but also on how to assess teacher performance in a blended i²Flex way at the K-12 level. The book will discuss the implementation of the i²Flex iSquareFlex, a non-traditional learning methodology which integrates internet-based delivery of content and instruction with faculty-guided student-independent learning in combination with face-to-face classroom instruction, aiming at developing higher-order cognitive skills within a flexible learning design framework. While highlighting new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, educational technology developers, and students interested in how the i²Flex model was implemented in classrooms and the effects of this learning model.

Technology Innovation and HRM Jin Chen, Zhongming Wang, 2005. In this e-book, technology innovation and HRM are reported through various areas of research which provide systematic evidence for the three integrated HR strategies for organizational effectiveness and competitive advantage. **Research in Education**, 1974
