SMARTER HORIZONS: Integrating AI, Cloud, and Renewable Energy for Next-Gen Educational IT Solutions Venkata Narasareddy Annapareddy, **Still Turning** Christopher C. Gillis, 2015-09-16 The Aermotor Windmill Company which commenced operations in Chicago in 1888 is the nation's sole remaining full-time manufacturer of water pumping machines. The company's imprint on rural America particularly across the West is still visible today in the tens of thousands of its windmills that bring water to the earth's surface. Still Turning is the first book to explore the rise of the American windmill through the experience of this important company. Aermotor founder La Verne Noyes and engineer Thomas Perry developed and perfected the all-metal wind pump in the 1880s. Within a decade the mathematical windmill began to dominate the market. Aermotor continued to expand and innovate. The ruggedness and simplicity of the American mechanical windmill has allowed it to outlast many newer water pumping technologies over the years with minimal maintenance and oversight. Christopher C. Gillis traces this story and more from the early days of the company to Aermotor's present-day relevance as it continues to produce its iconic windmills. Still Turning is a significant contribution not only to the history of wind power but also to the history of American enterprise. Existing assumptions and postulations about consumer consumption in various societies are being displaced largely due to the dynamic nature of the market. However, research has not been adequately devoted to explore the developments in consumer behavior in developing nations, which has resulted in numerous unanswered questions. Exploring the Dynamics of Consumerism in Developing Nations provides vital research on consumer behavior in developing countries and changes in the socio-cultural dimensions of marketing. While highlighting topics such as celebrity influence, marketing malpractices, and the adoption of e-government, this publication is ideally designed for researchers, advanced-level students, policymakers, and managers. **Energy Research Abstracts**, 1986
