BASIC PRINCIPLES OF WING CHUN

■ ■ ■ Zusammenfassung ■ ■ ■

Abstract.—The authors examined the relationship between the frequency of use of the Internet and the frequency of use of other information sources. The results showed that the frequency of use of the Internet was positively related to the frequency of use of other information sources. The results also showed that the frequency of use of the Internet was negatively related to the frequency of use of other information sources. The results suggest that the frequency of use of the Internet is a good indicator of the frequency of use of other information sources.
