to succeed so he set his eyes on freedom In the meantime Kelvin expected that a good academic performance would change his luck and put him right with Mr Eze or at least boost his confidence in his abilities With all his attention on his studies competing for the best grades against the leading brains in his class especially Christian an indomitable rival he would not let school romance get in the way of his goal But slowly and steadily Chioma gained his trust and won him over He would have to make a decision between holding on to his moral principle or satisfying his human desire for friendship New Home New Identity Marginalised and decimated the Biafran people were forced to go to war and secede from Nigeria But decades after losing the war and embracing the Nigerian identity they are still not treated as equal citizens in their home country As a new wave of terrorism sweeps the northern parts of the country the Biafran people predominantly Igbo are again decimated as they have been for decades in every crises and this led to renewed discussions about their independence For Biafra the fight for equality was over and their Sovereignty was not negotiable For Kelvin it wasn't very different and so his quest for truth and independence must begin His compulsory holiday in Igbo land would expose him to the truth that might have indirectly caused him to abandon his academic pursuit Perhaps it was just an excuse to free himself from the clutch of Mr Eze and begin his quest for the truth about his identity

Morality of Human Kinds Marion Godman, 2020-11-24 Natural kinds is a widely used and pivotal concept in philosophy the idea being that the classifications and taxonomies employed by science correspond to the real kinds in nature Natural kinds are often opposed to the idea of kinds in the human and social sciences which are typically seen as social constructions characterised by changing norms and resisting scientific reduction Yet human beings are also a subject of scientific study Does this mean humans fall into corresponding kinds of their own In The Epistemology and Morality of Human Kinds Marion Godman defends the idea of human kinds She first examines the scientific use and nature of human kinds considering the

arguments of key philosophers whose work bears upon human kinds such as Ian Hacking John Searle Richard Boyd and Ruth Millikan Using the examples of gender ethnic minorities and Buddhism she then argues that human kinds are a result of ongoing historical reproduction chiefly due to pre existing cultural models and social learning Her novel argument shifts the focus away from the reductionism characteristic of research about human kinds Instead she argues that they are multiply projectable and deserving of scientific study not in spite of but because of their role in explaining our identity injustice and the emergence of group rights
