Curriculum Change and Innovation Yiu Chun LO 鄧永祥, Shirley S. Y. Yeung 葉秀英, John T. S. Lam 林國榮, Anthony W. L. Leung 梁國治, 2012-06-01 Curriculum Change and Innovation is an introductory textbook on Hong Kong's school curriculum. Written in an approachable style using illustrative case studies, the textbook provides an introduction to the basic concepts and theories of curriculum as a field of study. It also discusses how sociopolitical and economic changes as well as technology advancements help transform teachers' roles and reshape curriculum policies. The chapters cover a wide range of topics including curriculum design, planning, implementation, and evaluation. These discussions are included to help readers critically reflect on their roles as change agents in curriculum development. Shirley S. Y. Yeung is an assistant professor in the Department of Curriculum and Instruction at the Hong Kong Institute of Education. John T. S. Lam is an assistant professor in the Department of Curriculum and Instruction at the Hong Kong Institute of Education. Anthony W. L. Leung is an assistant professor in the Department of Curriculum and Instruction at the Hong Kong Institute of Education. Yiu Chun Lo is an associate professor of the Department of Curriculum and Instruction at the Hong Kong Institute of Education. Who's who and why in After-war Education, 1921 *Handbook of Prosocial Education* Philip M. Brown, Michael W. Corrigan, Ann Higgins-D'Alessandro, 2012-10-12 Handbook of Prosocial Education is the definitive theoretical, practical, and policy guide to the prosocial side of education, the necessary second side of the educational coin. Academic teaching and learning are the first side of education; however, academic success depends upon the structures and support of prosocial educational efforts from promoting positive school climate to fostering student and teacher development to civic literacy and responsible and critical citizenship participation. The Handbook of Prosocial Education chapters, written by highly respected researchers and outstanding educators, represent the wide range of research-based prosocial interventions from pre-school through high school. The chapters explore and explain how prosocial education helps teachers create effective classroom learning environments to support the development of the whole student. Principals encourage positive school climate and superintendents work to improve the health and well-being of their systems. As readers will learn, when done well, prosocial education develops the capacities and competencies of students, teachers, and school administrators that lead to a more autonomous, positive self-concept, greater sense of purpose, more socially responsible behaviors, and increased connections between families, schools, and communities. This book pulls together in one place for the first time the various threads that create the prosocial education tapestry, making a compelling case for the necessity of changing national educational policy that continues to be ever more oriented to only the academic side of the educational coin, thus jeopardizing the foundational and historic purpose of educating our children for their full human development and participation in our democracy.

History Education and National Identity in East Asia Edward Vickers, 2013-09-13 Visions of the past are crucial to the way that any community imagines itself and constructs its identity. This edited volume contains the first significant studies of

the politics of history education in East Asian societies Community Engagement in Higher Education W. James Jacob, Stewart E. Sutin, John C. Weidman, John L. Yeager, 2015-06-17 There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local national and international levels But what is community engagement Even if this interest is genuine and widespread there are many different concepts of community service outreach and engagement The wide range of activity encompassed by community engagement suggests that a precise definition of the community mission is difficult and organizing and coordinating such activities is a complex task This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it Contributors provide empirical research findings including several case study examples that respond to the following higher education community engagement issues What is the community and what does it need and expect from higher education institutions Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities technical universities community colleges or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally competent researchers and professionals How can a university be global and at the same time locally relevant Is it or should it be left to the institutions to determine the scope and mode of their community engagement or is a state mandate preferable and feasible If community engagement or community service are mandatory what are the consequences of not complying with the mandate How effective are policy mandates and university engagement for regional and local economic development What are the principal features and relationships of regionally engaged universities Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it or should it be made mandatory for both faculty and students How can community engagement be better integrated with the other two traditional missions of the university research and teaching Cover image The Towering Four fold Mission of Higher Education by Natalie Jacob
