Ivanov,Andras Eke,2020-06-25 Widespread chronic diseases e g heart diseases diabetes and its complications stroke cancer brain diseases constitute a significant cause of rising healthcare costs and pose a significant burden on quality of life for many individuals Despite the increased need for smart healthcare sensing systems that monitor measure patients body balance there is no coherent theory that facilitates the modeling of human physiological processes and the design and optimization of future healthcare cyber physical systems HCPS The HCPS are expected to mine the patient s physiological state based on available continuous sensing quantify risk

indices corresponding to the onset of abnormality signal the need for critical medical intervention in real time by communicating patient's medical information via a network from individual to hospital and most importantly control actuate vital health signals e.g. cardiac pacing insulin level blood pressure within personalized homeostasis To prevent health complications maintain good health and/or avoid fatal conditions calls for a cross disciplinary approach to HCPS design where recent statistical physics inspired discoveries done by collaborations between physicists and physicians are shared and enriched by applied mathematicians control theorists and bioengineers This critical and urgent multi disciplinary approach has to unify the current state of knowledge and address the following fundamental challenges One fundamental challenge is represented by the need to mine and understand the complexity of the structure and dynamics of the physiological systems in healthy homeostasis and associated with a disease such as diabetes Along the same lines we need rigorous mathematical techniques for identifying the interactions between integrated physiologic systems and understanding their role within the overall networking architecture of healthy dynamics Another fundamental challenge calls for a deeper understanding of stochastic feedback and variability in biological systems and physiological processes in particular and for deciphering their implications not only on how to mathematically characterize homeostasis but also on defining new control strategies that are accounting for intra and inter patient specificity a truly mathematical approach to personalized medicine Numerous recent studies have demonstrated that heart rate variability blood glucose neural signals and other interdependent physiological processes demonstrate fractal and non stationary characteristics Exploiting statistical physics concepts numerous recent research studies demonstrated that healthy human physiological processes exhibit complex critical phenomena with deep implications for how homeostasis should be defined and how control strategies should be developed when prolonged abnormal deviations are observed In addition several efforts have tried to connect these fractal characteristics with new optimal control strategies that implemented in medical devices such as pacemakers and artificial pancreas could improve the efficiency of medical therapies and the quality of life of patients but neglecting the overall networking architecture of human physiology Consequently rigorously analyzing the complexity and dynamics of physiological processes e.g. blood glucose and its associated implications and interdependencies with other physiological processes represents a fundamental step towards providing a quantifiable mathematical definition of homeostasis in the context of critical phenomena understanding the onset of chronic diseases predicting deviations from healthy homeostasis and developing new more efficient medical therapies that carefully account for the physiological complexity intra and inter patient variability rather than ignoring it This Research Topic aims to open a synergetic and timely effort between physicians physicists applied mathematicians signal processing bioengineering and biomedical experts to organize the state of knowledge in mining the complexity of physiological systems and their implications for constructing more accurate mathematical models and designing QoL aware control strategies implemented in the new generation of HCPS devices By bringing together multi disciplinary researchers seeking to

understand the many aspects of human physiology and its complexity we aim at enabling a paradigm shift in designing future medical devices that translates mathematical characteristics in predictable mathematical models quantifying not only the degree of homeostasis but also providing fundamentally new control strategies within the personalized medicine era

are a combination of the following settings power speed resolution ppi frequency hz passes air assist z offset controlled defocusing

laser cutting parameters for diode and dpss lasers - Feb 16 2022

web feb 7 2018 all you need to know about laser cutting parameters using diode and dpss laser modules type of material thickness type of the laser power lenses laser cutting speed loops

effect of process parameters on laser cutting process a review - Jul 24 2022

web jul 9 2016 laser cutting is energy based unconventional process used to cut complicated shapes of various types of materials the objective of this paper is to investigate the effect of parameters

how different parameters affect laser cutting baison - Jun 22 2022

web may 24 2023 how do laser parameters influence laser cutting quality the chosen of laser cutting parameters directly affect the laser cutting quality here s how each parameter contributes to laser cutting quality power less power won t be able to cut through sheets in comparison an overpowered laser will damage the material surface

laser cutting wikipedia - Oct 27 2022

web laser cutting is a technology that uses a laser to vaporize materials resulting in a cut edge while typically used for industrial manufacturing applications it is now used by schools small businesses architecture and hobbyists laser cutting works by directing the

comprehensive guide to laser parameters for laser cutting - Sep 06 2023

web feb 16 2023 the adjustable laser parameters that have a direct impact on laser cutting settings include power wavelength pulse width and spot size power is limited by the maximum power rating of the laser system the wavelength pulse width and spot size however can all be directly manipulated and changed

free laser cutting parameter calculator mantech machinery uk - Oct 07 2023

web laser cutting engraving parameter setting guides find video demos for cnc routers co2 lasers fibre lasers and more keep this page bookmarked as we update it on a regular basis starter settings please note these are basic guidelines only giving you a better understanding of the parameters to use or start with

laser cutting parameters thomasnet - Jun 03 2023

web laser cutting parameters the laser cutting parameters are dependent on the beam characteristics the cutting rate required the composition and thickness of the material to be cut and the desired cut edge quality the laser cutting process and cut quality depend upon the proper selection of laser and workpiece parameters

crucial parameters for laser engraving and cutting snapmaker - Dec 29 2022

web jan 10 2023 the snapmaker laser engraving and cutting machine can perform laser operations in the following three

modes line filled engraving mode dot filled engraving mode and cutting mode in the following section we are going to learn how to test the work parameters under these three modes

laser cutting table thickness speed gas focus pressure - Aug 25 2022

web aug 27 2023 in this article we present a list of relevant parameters for ipg and raycus lasers including the cutting thickness cutting speed auxiliary gas focus pressure and cutting head size the listed ipg lasers include power outputs of 1000w 1500w 2000w 3000w 4000w 6000w and 8000w among others

prediction of laser cutting parameters for polymethylmethacrylate - May 22 2022

web jul 6 2020 four cutting parameters were used as input cutting parameters namely air pressure cutting speed thickness of pmma sheets and the laser beam power as they have a significant impact on the kerf geometry

modeling and process parameter optimization of laser cutting - Jan 30 2023

web may 23 2023 in general laser cutting quality is influenced by process parameters such as laser power scan speed repetition frequency pulse duration the type and pressure of the auxiliary gas and the type and thickness of the workpiece material removal rate surface roughness kerf width kw and heat affected zone haz are commonly

laser parameters basics and settings trotec laser - Feb 28 2023

web laser parameters are a combination of the following settings speed power hz passes air assist z offset controlled defocusing resolution ppi frequency hz passes laser parameters in the trotec jobcontrol laser software with the trotec jobcontrol software you will discover a wide selection of pre tested laser parameters already available

laser cutting parameters the ultimate guide acctek laser - Jul 04 2023

web finding the optimal laser cutting parameters requires a systematic and methodical approach as it involves optimizing various factors to achieve the desired cut quality speed and accuracy here is a detailed step by step guide on how to determine the best laser cutting parameters for your specific material and application

cutting parameters g u eagle laser - Mar 20 2022

web sep 22 2023 a set of appropriate cutting parameters is one of the most important technology for getting good machining results you can set a large group of parameters e g laser power cut speed focus position assist gas etc which can control almost every single detail of a cutting process

laser parameter an overview sciencedirect topics - Nov 27 2022

web in the laser cutting process laser parameters such as laser output power and pulsating frequency cutting speed assisting gas pressure and focal distance determine the end product quality the sideways burning along the cutting paths results in poor cutting quality particularly wedge cuts forming in sheet metal

machining parameter optimization for laser machining - Sep 25 2022

web jul 1 2022 this study evaluates the combination of laser cutting parameters to produce good machining result by using statistical method via jmp software 4 variable parameters were considered including material thickness laser

laser cutting parameters the definitive guide baison - Aug 05 2023

web dec 27 2022 the laser parameters include laser cutting quality wavelength beam polarization power and intensity cutting speed processing gas focal point and material specifications importance of laser cutting parameters
