SSC JE Civil Electrical Mechanical General Awareness Solved Papers **Meteoric Life of a Mathematician** Sunil N. Shabde, 2012 In British India during the 1920s a brilliant student jumped from graduation directly into research in the subject of his passion mathematics rejecting lucrative career options In the next 20 years with whirlwind speed he made exceptional achievements with his voluminous work in Legendre polynomials and his original work in Albert Einstein's Unified Field Theory at the Edinburgh University using a futuristic approach of fifth dimension His research was characterized not only by its originality and speed but by the fact that it was done almost single handedly without the luxury of working in a top tier university such as Harvard or Berkeley His publications including a book on Unified Field Theory received highly favorable reviews from renowned mathematicians such as Bateman Erdős and McC of Caltech Pasadena and Rainich of the University of Michigan In 1947 at the age of 40 he became one of the top few mathematicians in India and he was in a position to reach greater heights by moving to a better known research institution in India or in the United States Instead he followed his second passion education With a desire to give back to India he chose to contribute to higher education which the newly independent India desperately needed if she was to make rapid progress in science and technology Innocently unaware of hurdles he would face from the government he struggled through With sheer drive and creativity he made phenomenal contributions to the colleges of his state However being a man of research he was working against his instincts in a politically driven system Without recognition he fought for his dreams causing an unseen impact on his health This brilliant mathematician and devoted educator passed away at an early age of 54 before he was able to reach his goals as if somebody took away Van Gogh's paintbrush **CIVIL ENGINEERING (SSC JE 2020) YCT EXPERT TEAM,**
