language to provide a wealth and depth of language clearly situated within a historical cultural and social context Second Thoughts about the Second Coming Ronald J. Allen, Robert D. Cornwall, 2023-02-28 Various ideas float around about the subject of last things leading many Christians to conclude that they don't know what to think about the subject Yet at the core of the Christian doctrine of last things lies two simple and complementary hopes that God ever and always offers hope for our individual futures and for the future of the whole world In this helpful book Allen and Cornwall explain how we don't have to subscribe to sensationalist theories or sketchy interpretations to believe in Christian hope They walk the reader through the central biblical teachings on last things and then show the ways the church has interpreted those teachings throughout the centuries In a respectful way the authors demonstrate that end time beliefs centered on the Rapture came into existence only recently and they then offer several more life affirming contemporary interpretations as alternatives The book includes a study guide and web based appendixes designed to help pastors develop both topical and lectionary based sermon series on Christian hope Faith and Leadership Michael P. Riccards, 2012-04-19 This volume is the first major study of the papacy as a managerial structure that has evolved over two thousand years Special emphasis is placed on the environments in which the Church functioned and in which it had to reach uneasy compromises The volume is both scholarly and very readable The Pilgrim City Miles Hollingworth, 2010-08-24 An outstanding new examination of St Augustine's political philosophy and of its bearing upon the roots of Western civilization Education, Politics and Religion James Arthur, Liam Gearon, Alan Sears, 2010-06-28 In recent years a number of popular books have savaged religion arguing it is a dangerous delusion that poisons human societies and relationships This is but the most recent manifestation of a secularising agenda that has been sweeping contemporary democratic societies since the Enlightenment This book pushes back against that agenda examining its key assumptions and arguing that the exclusion of religious people and ideas from education and the public square is both undemocratic and unwise For the most part the book draws arguments and examples from Christianity the religious tradition of the authors but it recognises that many religions share the concerns and possibilities examined The book examines contemporary expressions of the secularising agenda in Western democracies with particular focus on how that is played out in education It demonstrates how republican theory understood within a faith perspective provides a shared understanding and substantive basis for education within a Western democracy It explores the historical connections and disconnections between religion and civic life in the West from ancient to contemporary times and examines religiously based civic action and pedagogical approaches contending both have the potential to contribute greatly to democracy It will be of value to any who are interested in exploring how democracies can include the voices of all their citizens the religious and the secular **Magic, Memory and Natural Philosophy in the Sixteenth and Seventeenth Centuries** Stephen Clucas, 2024-10-28 This collection of Stephen Clucas's articles addresses the complex interactions between religion natural philosophy and magic in sixteenth and seventeenth century Europe The essays on the Elizabethan

mathematician and magus John Dee show that the angelic conversations of John Dee owed a significant debt to medieval magical traditions and how Dee's attempts to communicate with spirits were used to serve specific religious agendas in the mid-seventeenth century. The essays devoted to Giordano Bruno offer a reappraisal of the magical orientation of the Italian philosopher's mnemotechnical and Lullist writings of the 1580s and 90s and show his influence on early-seventeenth-century English understandings of memory and intellection. Next come three studies on the atomistic or corpuscularian natural philosophy of the Northumberland and Cavendish circles, arguing that there was a distinct English corpuscularian tradition prior to the Gassendian influence in the 1640s and 50s. Finally, two essays on the seventeenth-century Intelligencer Samuel Hartlib and his correspondents show how religion, alchemy, and natural philosophy interacted during the Puritan Revolution.
