Area of a Shaded Region

Step 1: Identify the shape of the shaded region.

Step 2: Determine the dimensions of the shaded region.

Step 3: Calculate the area of the shaded region using the appropriate formula.

Step 4: Simplify the answer.

Step 5: Check the units of the answer.

Step 6: Write the final answer.

Diagram: A rectangle with a shaded square inside it. The rectangle has a length of 10 units and a width of 6 units. The shaded square has a side length of 4 units.

Calculation: The area of the shaded region is the area of the rectangle minus the area of the unshaded region. The area of the rectangle is $10 \times 6 = 60$ square units. The area of the unshaded region is $4 \times 4 = 16$ square units. Therefore, the area of the shaded region is $60 - 16 = 44$ square units.
