Anticipated Misconceptions/Needs:

- Students do not find the values of the expressions using the correct order of operations.
Remedy: students need to be reminded that grouping symbols () [] { } take precedence over operations.
- Students try to evaluate using mental math and forget to complete some of the operations.
Remedy: have students write down each step that they do before the mental math.

Connections to "Looker in Me"

Students use Habit 1: Students will be proactive by using the acronym PEMDAS to help them correctly evaluate numerical expressions.

Students use Habit 2: Students will begin with the End in Mind to solve word problems by using strategies and backward methods.

Students use Habit 3: Students will put First Things First by performing the operations in the parentheses first.

Students use Habit 5: Students will seek First to Understand, then to be Understood for discussion. Using Talk Formats from Math Operations, Readout button and Talk strategy (partner talk) to develop listening skills. Small group time students work in heterogeneous groups where to be used to help develop discussion and the use of math vocabulary.

Differentiation Strategies:
