Edwards, 2016-03-11 One of the central events of modern history World War I has been poorly presented in English language films Torn between the powerful isolationist movement in the U S and a growing hatred of the Hun contemporary films were mainly propaganda calling citizens to arms The American film industry used the outbreak of the war and the government's interest in promoting patriotic sacrifice as a means to expand and take the lead in the film industry worldwide More a business model than an art form these early efforts claimed a place of respectability for film among the arts Twenty years later though films produced about the war were few they were technically superior and generally carried conflicting messages about the war's mission and value while focusing more on storyline than history This study of English Language World War I films examines nearly

Physical Eloquence and the Biology of Writing Robert Ochsner, 1990-01-01 As a statement about literacy this book recommends an approach to teaching writing that stresses the neurological foundations of written English mastered almost like a foreign language Physical eloquence refers to neurological processes of hand eye and

ear that every writer must control in order to generate and simultaneously to interpret a written text Biology of writing refers to innate or otherwise untaught abilities that all people have for acquiring prose and which are not enhanced by formal learning Ochsner promotes a realistic writing curriculum that stresses subconscious processes in the biology of the writing process rather than planned rehearsed and formally practiced activities for learning to write He concludes that successful literacy instruction depends on a teacher's willingness to take into account the supremacy of popular culture and the ascendancy of its spoken idiom *Adult Catalog: Subjects* Los Angeles County Public Library, 1970 *Mosaic*, 1986
