Frontiers of Cardiac Electrophysiology M.B. Rosenbaum,Marcelo V. Elizari,2012-12-06 The goal of this book is to provide an integrated overview of some intriguing problems of cardiac electrophysiology Topics have been selected that encompass mainly aspects which have been a matter of concern and interest in our Department over the past few years We requested from the authors not only that they provide information about their own investigations but also that they integrate their results with those published by others Furthermore we urged them to be speculative in their interpretations in order to encourage exploration of related areas of investigation To this end the authors have presented their contributions in sufficient detail so that the information may not only educate the reader but also encourage and challenge him It is through the concept of total integration from in vitro to in vivo from animal to man from the pure scientist to the clinician that we hope to advance our understanding of cardiac electrophysiology The book brings together scientific work in which important advances have been made in the seventies and in which even more substantial progress is likely to be made in the present decade The chapters have been written by investigators who are authorities in the relevant scientific field No attempt at summarizing has been made as this may not seldom lead to oversimplification a risk that we do not dare take The table of contents and list of contributors are in this regard self explanatory Cumulated Index Medicus ,1969 **Congestive**

Chase,Mohan C Vemuri,2012-12-12 Over the past decade significant efforts have been made to develop stem cell based therapies for difficult to treat diseases Multipotent mesenchymal stromal cells also referred to as mesenchymal stem cells MSCs appear to hold great promise in regards to a regenerative cell based therapy for the treatment of these diseases Currently more than 200 clinical trials are underway worldwide exploring the use of MSCs for the treatment of a wide range of disorders including bone cartilage and tendon damage myocardial infarction graft versus host disease Crohn s disease diabetes multiple sclerosis critical limb ischemia and many others MSCs were first identified by Friendenstein and colleagues as an adherent stromal cell population within the bone marrow with the ability to form clonogenic colonies in vitro In regards to the basic biology associated with MSCs there has been tremendous progress towards understanding this cell population s phenotype and function from a range of tissue sources Despite enormous progress and an overall increased understanding of MSCs at the molecular and cellular level several critical questions remain to be answered in regards to the use of these cells in therapeutic applications Clinically both autologous and allogenic approaches for the transplantation of MSCs are being explored Several of the processing steps needed for the clinical application of MSCs including isolation from various tissues scalable in vitro expansion cell banking dose preparation quality control parameters delivery methods and numerous others are being extensively studied Despite a significant number of ongoing clinical trials none of the current therapeutic approaches have at this point become a standard of care treatment Although exceptionally promising the clinical translation of MSC based therapies is still a work in progress The extensive number of ongoing clinicaltrials is expected to provide a clearer path forward for the realization and implementation of MSCs in regenerative medicine Towards this end reviews of current clinical trial results and discussions of relevant topics association with the clinical application of MSCs are compiled in this book from some of the leading researchers in this exciting and rapidly advancing field Although not absolutely all inclusive we hope the chapters within this book can promote and enable a better understanding of the translation of MSCs from bench to bedside and inspire researchers to further explore this promising and quickly evolving field **British Medical Journal** ,1924
