

California State Test (CST) Implementation Information

The Department has no longer available for download, and will not update the [test specifications](#) for the California State Test (CST) as a permanent implementation of the [California Assessment of Student Performance and Progress \(CAASPP\)](#) is underway.

Overview

The State of CALIFORNIA administers the California State Test as CST. This is also the final change to SBP18. All of the requirements under the SBP18 SAC have been included in July 2018.

The CST is a new domain or portion of the National Test. This new domain includes 20 questions which bring the length of the National Test Component with California State Standards CCA questions, all which will use current specifications. The table below provides details on the features of the implementation.

The CST included test questions on their knowledge of high level state related content that is listed on the SAC B that and the CIPSA/CAASPP related State Learning Objectives (SLO) which will be implemented on SBP18. The questions will be the same as the National Test Component with California State Standards, and the State will use CST including information on the [SAC B](#).

The CST implementation also updates test components for the states that adopt it. This means by passing the National with California State Standards as the State will use CST, as a permanent solution for testing requirements for teachers in the following States, and also states that adopt in the future.

As of July 1, 2018, all states that have approved have adopted the CST. The following table provides information on the CST as a permanent solution for testing requirements for the states that have approved with California State Standards. The table also provides information on the states that have approved the CST, as well as [CST Implementation and Table](#).
