

A foetus learns intensely in the womb. One's earliest experiences imprint and become the subconscious programming. Prenatal-period is the time of building the foundations of a health body, emotions, and relationships. These established patterns are at the root of much health, relationship, emotional/psychological and learning problems seen as all ages. This book is enthusiastic celebration of motherhood and child upbringing. It explores the psychology of conception, pregnancy, delivery and the postpartum period, as well as the newborn child's intellectual and emotional development. There are signposts in these pages. Readers can use them to find their way to great treasures.

Sri Kalyani, after completing her basic level of studies, opted for Psychology for the higher level of education as she was much interested in that field of studies.

She studied all theories related to psychology and therapies to cure the psychological disorders .

After the studies, while treating the psychologically affected patients, she found the analogy between human beings and computers. The human brain is psychologically affected in the same way the viruses are affecting the computers. Like the computers in which it is very difficult to completely eliminate the virus as there will always be another virus lurking somewhere, the human brains, affected with childhood experiences , will readily bring up a new kind of psychological disorder after getting treated for one kind of disorders.

Then she started working to find out a therapy which would work like a firewall in a computer which does not allow any virus at all. She analysed this with evidences proved through researches spiritually, clinically, scientifically and psychologically. It paved the way for the birth of DHYANBABY which assists the expectant mothers to instill firewall into the minds of their babies in the womb.

This book will not only reveal the back grounds about that wonderful therapy, but also about successful motherhood. For the past 13 years it have been followed by many expectant mothers with positive results.
