Proceedings of CECNet 2021 Antonio J. Tallón-Ballesteros,2022-01-15 It is almost impossible to imagine life today without the electronics communications and networks we have all come to take for granted The 6G network is currently under development and some chips able to operate at the Terahertz THz scale have already been introduced so the next decade will probably see the consolidation of 6G based technology as well as many compliant devices This book presents the proceedings of the 11th International Conference on Electronics Communications and Networks CECNet 2021 initially planned to be held from 18 21 November 2021 in Beijing China but ultimately held as an online event due to ongoing COVID 19 restrictions The CECNet series is now an established annual event attracting participants in the interrelated fields of

electronics computers communications and wireless communications engineering and technology from around the world
Careful review by program committee members who took into consideration the breadth and depth of those research topics
that fall within the scope of CECNet resulted in the selection of the 88 papers presented here from the 325 submissions
received This represents an acceptance rate of around 27% Providing an overview of current research and developments in
these rapidly evolving fields the book will be of interest to all those working with digital communications networks **Pulp
