Summer Gone English Edition:

Catalog of Copyright Entries Library of Congress. Copyright Office, 1970 **A Child Is Not a Knife** Göran Sonnevi, 2023-06-06 Göran Sonnevi is one of Sweden's most celebrated, respected and prolific poets. For this first book-length selection of Sonnevi to appear in English, Rika Lesser has chosen works written between 1971 and 1989, although most of the poems come from the last decade and from Sonnevi's last three books, which form part of the single, ongoing, unending, infinite, interminable poem that he continues to write from book to book. Of Lesser's introduction to the work, Richard Howard writes: Lesser's wonderful prose texts at the outset provide not only an ingress into complex and baffling matter, but one of the most determined statements of the translator's text since Walter Benjamin. From by land, 1982. We are here in the ultimate lives of our bodies, negations of the ultimate negation. We are complete parts of the world. We rise up out of infinity like the limestone flats from the sea. Like the stars, we are denials of infinity. One day we shall reach all the way there. **The Home Book of Verse, American and English, 1580-1920** Burton Egbert Stevenson, 1926. Collects both American and English children's poetry from 1580-1920. **Scientists Against Time** H. A. Feiveson, 2018-03-12. In early 1942, the fate of the Allies appeared dire. Germany had conquered most of Western Europe, and its armies were deep into Russia. Japan had overrun Manchuria, the Philippines, and the Dutch East Indies had conquered large swathes of China and had destroyed much of the US battle fleet at Pearl Harbor. But the tide of World War II turned dramatically in favor of the Allies, and in this, Allied scientists played a critical role. The chapters covered in this book include an Overview, summary of the entire war, the Battle of Britain, the Battle of the Atlantic against the German U-boats, the battle for command of the air, the Allied breaking of the German Enigma cipher, D-Day, and the Allied invasion of Europe, and the Manhattan Project to develop an atomic bomb. Harold Feiveson is a deep student of history, a masterful storyteller, and one of the pioneers in the global cooperative effort to stop the spread of nuclear weapons. This book provides a new, integrated overview of the remarkable technical achievements by the U.S. and British scientists who helped turn the tide of World War II. Although the war seemed endless to the participants, the number of world-shaping developments that occurred during the six years after the world's industrialized countries committed themselves to total war is both remarkable and terrifying. The final breakthrough, nuclear weapons, led to a post-war nuclear arms race, whose dangerous legacy of destructive potential we are still struggling with today. Frank von Hippel, Professor of Public and International Affairs, emeritus, Princeton University. An authoritative introduction to what Winston Churchill called the wizard war. Feiveson's examination of the crucial role played by science and technology in World War II will appeal to both specialists and military history buffs. Colonel Paul L. Miles, U.S. Army Retired, former lecturer in history, Princeton University. **The Home Book of Verse, American and English, 1580-1912**, 1912 **Catalog of Copyright Entries, Third Series**, 1967. Cyclopædia of American Literature Evert Augustus Duyckinck, George Long Duyckinck, 1875 *Letters and Documents* Søren Kierkegaard, 2009-10-25 This volume provides the first English translation of all the known correspondence to and from Søren Kierkegaard including a number of his letters in draft form and papers pertaining to his life and death. These fascinating documents offer new access to the character and lifework of the gifted philosopher theologian and psychologist. Kierkegaard speaks often and openly about his desire to correspond and the resulting desire to write for a greater audience. He consciously recognizes letter writing as an opportunity to practice composition. Unlike most correspondence Kierkegaard's letters expressly do not require a reply; he insists on this as a principle while he clearly and earnestly yearns for a response to his efforts. Among his other principles are purposefulness, directness, and the equality of a letter to a visit with a friend. Kierkegaard preferred the former to the latter. Perhaps more than anything else in print, Kierkegaard's *Letters and Documents* reveal his love affair with the written word. **The Golden Book of English Song** William Henry Davenport Adams, 1875 **The Poets and Poetry of America** Rufus Wilmot Griswold, 1856 Faith, Medical Alchemy and Natural Philosophy John T. Young, 2018-08-13 Published in 1998, this is a fundamental reassessment of the world view of the alchemists, natural philosophers, and intelligencers of the mid 17th century. Based almost entirely upon the extensive and hitherto little researched manuscript archive of Samuel Hartlib, it charts and contextualises the personal and intellectual history of Johann Moriaen c. 1592-1668, a Dutch-German alchemist and natural philosopher. Moriaen was closely acquainted with many of the leading thinkers and experimenters of his time, including René Descartes, Jan Comenius, Johann Glauber, and Johannes Kepler. His detailed reports of relations with these figures and his response to their work provide a uniquely informed insight into the world of alchemy and natural philosophy. This study also illuminates the nature and mechanisms of intellectual and technological exchanges between Germany, The Netherlands, and England. The Artist , 1855
