*A Prose English Translation of Srimadbhagavatam* Manmatha Nath Dutt, 1896 , Medical Practice in Twelfth-century China - A Translation of Xu Shuwei's Ninety Discussions [Cases] on Cold Damage Disorders Asaf Goldschmidt, 2019-06-28 This book is an annotated translation of Xu Shuwei's 1080-1154 collection of 90 medical case records *Ninety Discussions of Cold Damage Disorders* shanghan jiushi lun which was the first such collection in China. The translation reveals patterns of social as well as medical history. This book provides the readers with a distinctive first-hand perspective on twelfth-century medical practice including medical aspects such as nosology, diagnosis, treatment, and doctrinal reasoning supporting them. It also presents the social aspect of medical practice, detailing the various participants in the medical encounter, their role, the power relations within the encounter, and the location where the encounter occurred. Reading the translation of Xu's cases allows the readers high-resolution snapshots of medicine and medical practice as reflected from the case records documented by this leading twelfth-century physician. The detailed introduction to the translation contextualizes Xu's life and medical practice in the broader changes of this transformative era. Designing High-Density Cities Edward Ng, 2009-12-16 Compact living is sustainable living. High-density cities can support closer amenities, encourage reduced trip lengths, and the use of public transport, and therefore reduce transport energy costs and carbon emissions. High-density planning also helps to control the spread of urban suburbs into open lands, improves efficiency in urban infrastructure and services, and results in environmental improvements that support higher quality of life in cities. Encouraging even requiring higher-density urban development is a major policy and a central principle of growth management programmes used by planners around the world. However, such density creates design challenges and problems. A collection of experts in each of the related architectural and planning areas examines these environmental and social issues and argues that high-density cities are a sustainable solution. It will be essential reading for anyone with an interest in sustainable urban development. *Traditional Chinese Medicine* Henry C. Lu, 2005 The wisdom of 4,000 years of traditional Chinese medicine, with its accompanying philosophies, continues to gain popularity in Western culture, even with many Western medical practitioners. In this book, Dr Lu familiarizes us with the thirteen syndromes identified in Chinese medicine but incorporates more familiar Western medical terminology. The result is a handbook that straddles both traditions. Dr Lu provides treatments for everything from bronchitis, cirrhosis, and chronic hepatitis to hypertension, osteoporosis, and sciatica conditions that plague us and are often untreatable with conventional Western medical techniques. In addition to providing help for chronic ailments, Dr Lu offers treatments for problems that affect men or women specifically, with sections on diseases of the prostate gland and impotence, pre- and postnatal care, and PMS and menopause. Also included are guidelines and specific instructions for using exercises, herbal cures, acupuncture, and food cures that are not as drastic or invasive as Western medicine yet can be very effective while producing very few side effects. Many of the techniques not only rejuvenate
