Changing Conceptions Relative to the Planning of Lessons Lois Coffey Mossman, 1924 **Preparing Teachers for Deeper Learning at Trinity University** Roneeta Guha, Steven K. Wojcikiewicz, 2019-05-28 The Trinity University case is one of seven that form the basis for the arguments and analyses presented in *Preparing Teachers for Deeper Learning*. Each case outlines the context, vision, and practices guiding a particular program's enactment and includes sample curricula, assessment, and feedback forms, and the program details that have contributed to its success. The cases are valuable reading for educators involved in developing teacher candidates who are self-directed, collaborative, social justice focused, and prepared to meet the needs of today's students and a changing society. Summer Learning Geoffrey D. Borman, Matthew Boulay, 2004-04-26 This book brings together up-to-date research-based evidence concerning summer learning and provides descriptions and analyses of a range of summer school programs. The chapters present theory and data that explain both the phenomenon of summer learning loss and the potential for effective summer programs to mitigate loss and increase student achievement. *Summer Learning: Research, Policies, and Programs* presents evidence describing variations in summer learning loss and how these learning differences affect equality of educational opportunity and outcomes in the United States; discusses the development, characteristics, and effects of the most recent wave of summer programs which are designed to play key roles in the recent standards movement and related efforts to end social promotion; examines the impact of three of the most widespread, replicable summer school programs serving students across the United States; and considers the characteristics and effects of alternative programs and practices that are designed to combat the problem of summer learning loss head-on. Intended for education researchers, practitioners, policymakers, and graduate students, this volume is particularly relevant to those interested in social stratification, equity-minded policies, implications of the current standards movement, and high-stakes testing and the development of programs and practices for improving education.
