Rolleston, 1867 **Great Circles** Emily Rolfe Grosholz, 2018-11-13 This volume explores the interaction of poetry and mathematics by looking at analogies that link them The form that distinguishes poetry from prose has mathematical structure lifting language above the flow of time as do the thoughtful ways in which poets bring the infinite into relation with the finite The history of mathematics exhibits a dramatic narrative inspired by a kind of troping as metaphor opens metonymy and synecdoche elaborate and irony closes off or shifts the growth of mathematical knowledge The first part of the book is autobiographical following the author through her discovery of these analogies revealed by music architecture science fiction philosophy and the study of mathematics and poetry The second part focuses on geometry the circle and square launching us from Shakespeare to Housman from Euclid to Leibniz The third part explores the study of dynamics inertial motion and transcendental functions from Descartes to Newton and in 20th c poetry The final part contemplates infinity as it emerges in modern set theory and topology and in contemporary poems including narrative poems about modern cosmology The Imperial Dictionary of the English Language John Ogilvie, 1883 *The Imperial dictionary, on the basis of Webster's English dictionary* John Ogilvie, 1883 **Nature** Sir Norman Lockyer, 1904 **A Middle-English Dictionary** Francis Henry Stratmann, Henry Bradley, 1891 *Winters in the World* Eleanor Parker, 2023-07-25 Interweaving literature history and religion an exquisite meditation on the turning of the seasons in medieval England now in paperback *Winters in the World* is a beautifully observed journey through the cycle of the year in Anglo Saxon England exploring the festivals customs and traditions linked to the different seasons Drawing on a wide variety of source material including poetry histories and religious literature Eleanor Parker investigates how Anglo Saxons felt about the annual passing of the seasons and the profound relationship they saw between human life and the rhythms of nature Many of the festivals celebrated in the United Kingdom today have their roots in the Anglo Saxon period and this book traces their surprising history while unearthing traditions now long forgotten It celebrates some of the finest treasures of medieval literature and provides an imaginative connection to the Anglo Saxon world Learning and Literature in Anglo-Saxon England Michael Lapidge, Helmut Gneuss, 1985 An collection of essays by specialists in the field examining Anglo Saxon learning and text interpretation and transmission *The Aramaic Books of Enoch and Related Literature from Qumran* , 2024-05-13 This volume contains studies that explore the content and meaning of the Qumran manuscripts of the Aramaic Books of Enoch the Book of Giants and related literature The essays shed new light on the lexicon orthography and grammar of the Aramaic scrolls as well as their relationship to schematic astronomy in ancient Mesopotamia Contributors examine the origin of the angelic tradition of the

the traditional four seasons and encourages us to think about how we view changes in our natural world Since 1788 Australia has carried the yoke of four European seasons that make no sense in most parts of the country We may like them for historical or cultural reasons or because they are the same throughout the world but they tell us nothing of our natural environment It s time to reject those seasons and to adopt a system that brings us more in tune with our plants and animals a system that helps us to notice and respond to climate change Using examples from his 25 years working in botanic gardens author Timothy Entwisle illustrates how our natural world really responds to seasonal changes in temperature rainfall and daylight and why it would be better to divide up the year based on what Australian plants do rather than ancient rites of the Northern Hemisphere Sprinter and Sprummer opens with the origins and theory of the traditional seasonal system and goes on to review the Aboriginal seasonal classifications used across Australia Entwisle then proposes a new five season approach explaining the characteristics of each season along with the biological changes that define them The book uses seasons to describe the fascinating triggers in the life of a plant and plant like creatures using charismatic flora such as carnivorous plants the Wollemi Pine and orchids as well as often overlooked organisms such as fungi The final chapter considers climate change and how the seasons are shifting whether we like it or not
