 of experimental space astronomy The number of astronomers whose knowledge and interest is concentrated on interpreting
 observations has grown substantially in the past decades yet the number of scientists who are familiar with and capable of
 dealing with instrumentation has dwindled All of the authors of this work are leading and experienced experts and
 practitioners who have designed built tested calibrated launched and operated advanced observing equipment for space
 astronomy This book also contains concise information on the history of the field supported by appropriate references
 Moreover scientists working in other fields will be able to get a quick overview of the salient issues of observing photons in
