Virginia Work Area Protection Manual, 2003 *Virginia Work Area Protection Manual* Virginia. Department of Transportation, 1993 Virginia Work Area Protection Manual, 1996 Guidance for Implementation of the AASHTO Strategic Highway Safety Plan Nicholas D. Antonucci, National Cooperative Highway Research Program, 2005 Also available online via the Web pages of the TRB Cooperative Research Programs www4.trb.org/trb/crp/nsf **Route 37 Highway Transportation Improvement, Construction from VA-37/I-81/US 11 (south) to VA-37/US-11 (north), Frederick County**, 2001 Selection and Application of Warning Lights on Roadway Operations Equipment Ronald Bruce Gibbons, National Cooperative Highway Research Program, 2008 TRB's National Cooperative Highway Research Program NCHRP Report 624 Selection and Application of Warning Lights on Roadway Operations Equipment explores recommended guidelines for the selection and application of warning lights on roadway operations equipment **I-73 Location Study Between Roanoke and the North Carolina State Line, Bedford, Botetourt, Franklin, Henry and Roanoke Counties**, 2007 **Use of Police in Work Zones on Highways in Virginia** E. D. Arnold, 2003 It is generally accepted that one of the most effective ways of controlling speed in a work zone is to have a staffed police car positioned at the beginning of the work zone with its lights flashing and radar on. Drivers detect the presence of police either visually or via radar detectors and reduce their speed to comply with the posted work zone speed limit. The reduced speeds and reduced variation in speeds result in fewer accidents and minimize dangerous interactions between vehicles and work zone workers and equipment. A number of studies support these observations. The use of police enforcement in work zones is a common practice among state departments of transportation and the Virginia Department of Transportation (VDOT) is no exception. VDOT has an agreement with the Virginia State Police (VSP) for paying for and implementing the strategy in VDOT work zones and a mutually developed set of guidelines for using police enforcement. The purpose of the research was to document the current practices regarding the use of police in work zones in Virginia and to determine if any enhancements could be made. The research effort consisted of literature reviews to establish the background for police enforcement in work zones, discussion with and input from VDOT and VSP personnel and the administration of a questionnaire survey. A questionnaire survey was sent to personnel in VDOT, VSP and VMS Inc. asking the respondent's opinion about the effectiveness of using police in work zones and a number of questions about the work zone enforcement practices being used. The use of police in work zones was almost unanimously felt to be effective in reducing speeds and improving safety in work zones and few adverse effects were noted. Recommendations were made regarding the development and implementation of training in basic work zone operations, the development of a standard agreement for possible use with local police agencies, the use of more than one police officer, the promotion of the maximum 500 fine for speeding in work zones, the requirement that police officers wear safety vests when outside their vehicle in a work zone and the development of a standard pay practice for cancellations Coalfields

Zone Traffic Control Benjamin H. Cottrell,1999 The objective of this study was to examine traffic control for night work
zones from the perspective of both agencies and motorists This was accomplished by investigating practices of state
departments of transportation identifying the problems associated with traffic control for night work zones and identifying
potential strategies to resolve them Reduced visibility driver impairment or inattention inadequate lighting and difficulty in
maintaining traffic control devices are common problems identified with night work zones based on surveys of state
departments of transportation and residencies within the Virginia Department of Transportation Having police present
making workers more visible using drums in the taper maintaining traffic control devices and providing adequate lighting
were common solutions Based on the review of work zones traffic control for night work zones is generally adequate
Common problem areas were properly establishing work zones based in accordance with the Virginia Work Area Protection
Manual maintaining the traffic control devices and properly aiming and aligning lighting to avoid glare Although there is a
perception that night work zones are less safe than daytime work zones evidence to substantiate this perception such as
higher accident rates was not available because of a lack of accurate traffic exposure data Based on a limited amount of data
there was no evidence of the perceived higher speeds at night Virginia State Documents ,2006 **Appalachian**
