Question #2 of 9

Question ID: 1575466

To generate more sales on slow days, a hair salon will be offering its services at a 50% discount on Sundays and Mondays, but it will increase its prices by 20% on Fridays and Saturdays. Which pricing model *best* describes the company's strategy?

- A) Dynamic pricing. 
- B) Razors-and-blades. 
- C) Tiered pricing. 

Explanation

Dynamic pricing is a pricing model where a company charges different prices based on what time of day or time of week a purchase is made. Offering the same services at different prices on busier and slower days is an example of dynamic pricing.

Tiered pricing is a pricing model based on the volume of purchases; typically, the greater the volume purchased, the greater the overall price discount. *Razors-and-blades* is a pricing model for multiple products; typically, one product is sold at a low price and low margin, while a second complementary product is sold at a high margin.
