

Research findings indicate that overheating your baby with too much clothing or too warm of a room temperature may increase the risk of SIDS, particularly if they have a fever. Parents are encouraged to set the room temperature to what would be comfortable for a lightly clothed adult and layer the baby's clothing/sleepwear to keep the baby at a comfortable temperature without the use of loose blankets in the crib. Your baby should never feel hot to the touch.

SAFE SLEEP SAVES LIVES! First Candle reminds parents and caregivers that the safest place for your baby to sleep, for at least the first six months, is **ALONE**, on his or her **BACK**, in a safety approved **CRIB** placed near your bed. By following these simple rules, you can help protect your baby from SIDS, suffocation and accidents during sleep.

- **ALWAYS** place your baby to sleep on his or her back on a firm mattress covered with only a tight-fitting sheet
- Remove all soft bedding and other items from your baby's sleep area (pillows, blankets, quilts, stuffed animals, etc.)
- Soft or pillow-like bumpers, wedges and positioners should never be used in your baby's sleep area
- Use a wearable blanket or other type sleeper instead of loose blankets to keep your baby warm and safe
- Do not place your baby to sleep on any soft surfaces (sofas, chairs, waterbeds, quilts, adult beds, etc.)
- Bring your baby into bed for feedings and bonding, but when it's time to go to sleep, place your baby alongside your bed in his or her own separate space
- Consider offering your baby a pacifier every time you place him or her down to sleep - research shows that regular use of a pacifier can greatly reduce the risk of SIDS
- Don't let your baby get too warm - layer clothing and keep room temperature at what would be comfortable for a lightly clothed adult
- Make sure your baby has a safe place to sleep when visiting or traveling
- Educate everyone who cares for your baby about these important rules!
