Conflictology Francis Onditi,2020-05-28 Over the past three decades scholars students and policy makers studying and engaged in conflict resolution have veered between conflict management and resolution However the changing nature of conflict which is taking the form of radicalization and extremism are deeply rooted in individual s ideology personalities and genes hence rendering the conventional macro level power balance analytics obsolete The psychology and human genetics are at the center of this evolution This shift in conflict trends and methods of warfare in Africa and the world over demands that we search for alternative approaches mechanisms and innovative response It is against this background that this new book initiates a fundamental debate on how interdisciplinary adventure could increase the understanding of man kind and the socio biological systems surrounding man hence the emphasis on the discipline of Conflictology to embody scientific approaches methods and prescription to conflict resolution For instance does individual s gene influence human behaviours such as hate If so can this be corrected through gene transposition If human relations should be anchored on peace what are these genetic and behavioural factors that creat hate and violence How then should such a gene or neurobiological system be altered in order to prevent extremism and radicalization
