landscapes cityscapes cultures indeed on the very fabric of the modern world is profound Cars have brought benefits to
individuals in terms of mobility and expanded horizons but the cost has been very high in terms of damage to the
environment and the consumption of precious resources Despite the growing belief that a Faustian price is now being paid
for the freedom cars have bestowed on us we are none the less manufacturing them in ever greater numbers Autopia is the
first book to explore the culture of the motor car in the widest possible sense Featuring newly commissioned essays by
writers critics historians artists and film makers as well as reprinting key texts it examines the effect of the car throughout
the world including the USA Western and Eastern Europe Japan China Cuba India and South Africa In this book the car is
treated neither as a technological fetish object nor as an instrument of danger Instead it is examined as a hugely important
determinant of 20th century culture neither wholly good nor an unmitigated disaster and certainly endlessly fascinating
Contributors include Michael Bracewell Ziauddin Sardar Al Rees Martin Pawley Donald Richie and Peter Hamilton Key texts
