 - "The Dissection of the Sheep Heart" posted by Shannon Muskopf
 - "Mrs. Johnson's Sheep Heart Dissection" posted by stacyelambert

Purpose: To examine the major features of a mammalian heart.

The following is the procedure for the actual dissection. Read through the lab and answer the questions using the websites above as resources.

Procedure:

1. Observe the sheep heart ventral surface up (See Figure 1 below).

Figure 1

2. On the outside of the heart is the *visceral pericardium*, which is a thin, transparent layer on the surface of the heart. Under this is the *myocardium*. Also note the abundance of fat along the paths of various blood vessels. This adipose tissue occurs in the loose connective tissue that underlies the visceral pericardium.

Study the images. How can you tell which side of the heart is the ventral surface?
