POLLIO, 2018 **Vitruvius** Vitruvius, 2021-07-28 VITRUVIUS The Ten Books of

Architecture by Marcus Vitruvius Pollio 80 15 BC is the first complete treatise that we have on architecture Reading it is an unmitigated source of joy for someone who has an amateur s interest in architecture or Roman history People who have simply visited sites Roman buildings Timgad Rome Nimes or Pompeii will also take a great pleasure in Vitruvius work as it explains so what of what one has seen at these places THIS COPY CONTAINS AN INTRODUCTION ABOUT THE AUTHOR AND A DETAILED INTRODUCTION TO THE CONTENT OF THE BOOK     *Vitruvius* Vitruvius, Morris Hicky Morgan, 2022-07-27 2022 Reprint of the 1914 Edition Includes illustrations Exact facsimile of the original edition and not reproduced with Optical Recognition Software Translated by Morris Hicky Morgan with illustrations and original designs prepared under the direction of Herbert Langford Warren Marcus Vitruvius Pollio a Roman architect and engineer flourishing in the first century B C was the author of the oldest and most influential work on architecture in existence For hundreds of years the specific instructions he gave in his Ten Books on Architecture were followed faithfully and major buildings in all parts of the world reveal the widespread influence of his precepts According to the Encyclopedia Britannica he was the chief authority studied by architects and in every point his precepts were accepted as final Bramante Michelangelo Palladio Vignola and earlier were careful students of the work of Vitruvius His book is thus one of those rare works that have been supremely important in the creation of the greatest art masterpieces Vitruvius describes the classic principles of symmetry harmony and proportion in architecture the design of the treasury prison senate house baths forum and temples the construction of the theater its site foundations and acoustics the proper style and proportion for private dwellings the differences between the Ionic Doric and Corinthian styles methods of giving durability and beauty to polished finishings and many other topics It is a direct authoritative and detailed introduction to the ancients methods of construction the materials of the architect and the prevailing aesthetic beliefs of the times but it is also a work of art Vitruvius wrote in such a fascinating manner and digressed from his subject so often as for instance when he wrote about the winds Archimedes in his bath and why authors should receive awards and honors at least as often as athletes that his book has had a continuing appeal to the general reader for many centuries Besides being an instructive treatise on nearly everything connected with Roman and Greek architecture it is an entertaining description of some aspects of the life and beliefs of the times This edition is the standard English translation prepared over a period of several years by Professor M H Morgan of Harvard University     *Vitruvius* Vitruvius, 1960     *Ten Books on Architecture* Vitruvius, 2016-01-02 Ten Books on Architecture from Vitruvius Marcus Vitruvius Pollio was a Roman writer architect and engineer 70s BCE c 15 BCE     *Los Diez Libros de Arquitectura* Vitruvius Pollio, 1960-01-01 The oldest and most influential book ever written on architecture this volume describes the classic principles of symmetry harmony and proportion as well as the ancients methods materials and aesthetics Authoritative translation     **The Architecture of Marcus Vitruvius Pollio, tr. by J. Gwilt** Marcus Vitruvius Pollio, 1874     **Ten Books on Architecture** Vitruvius, 2019-12-25 The architect should be equipped with knowledge of many branches

of study and varied kinds of learning for it is by his judgement that all work done by the other arts is put to test This knowledge is the child of practice and theory Practice is the continuous and regular exercise of employment where manual work is done with any necessary material according to the design of a drawing Theory on the other hand is the ability to demonstrate and explain the productions of dexterity on the principles of proportion 1 While your divine intelligence and will Emperor Caesar were engaged in acquiring the right to command the world and while your fellow citizens when all their enemies had been laid low by your invincible valour were glorying in your triumph and victory while all foreign nations were in subjection awaiting your beck and call and the Roman people and senate released from their alarm were beginning to be guided by your most noble conceptions and policies I hardly dared in view of your serious employments to publish my writings and long considered ideas on architecture for fear of subjecting myself to your displeasure by an unseasonable interruption 2 But when I saw that you were giving your attention not only to the welfare of society in general and to the establishment of public order but also to the providing of public buildings intended for utilitarian purposes so that not only should the State have been enriched with provinces by your means but that the greatness of its power might likewise be attended with distinguished authority in its public buildings I thought that I ought to take the first opportunity to lay before you my writings on this theme For in the first place it was this subject which made me known to your father to whom I was devoted on account of his great qualities After the council of heaven gave him a place in the dwellings of immortal life and transferred your father's power to your hands my devotion continuing unchanged as I remembered him inclined me to support you And so with Marcus Aurelius Publius Minidius and Gnaeus Cornelius I was ready to supply and repair ballistae scorpiones and other artillery and I have received rewards for good service with them After your first bestowal of these upon me you continued to renew them on the recommendation of your sister 3 Owing to this favour I need have no fear of want to the end of my life and being thus laid under obligation I began to write this work for you because I saw that you have built and are now building extensively and that in future also you will take care that our public and private buildings shall be worthy to go down to posterity by the side of your other splendid achievements I have drawn up definite rules to enable you by observing them to have personal knowledge of the quality both of existing buildings and of those which are yet to be constructed For in the following books I have disclosed all the principles of the art The Ten Books on Architecture Vitruvius Pollio, Morris Hicky Morgan, Herbert Langford Warren, Nelson Robinson, 2013-09-29 The Ten Books on Architecture Complete New Student Edition By Vitruvius Pollio Marcus Vitruvius Pollio born c 80 70 BC died after c 15 BC was a Roman author architect and engineer during the 1st century BC perhaps best known for his multi volume work entitled De Architectura By his own description Vitruvius served as a ballista artilleryman the third class of arms in the military offices He likely served as chief of the ballista senior officer of artillery in charge of doctores ballistarum artillery experts and libratores who actually operated the machines Little is known about Vitruvius life Most inferences about him are extracted

from his only surviving work *De Architectura*. His first name Marcus and his cognomen Pollio are uncertain. He was possibly a *praefectus fabrum* during military service or *praefectus architectus armamentarius* of the apparitor status group. During the last years of his life Professor Morgan had devoted much time and energy to the preparation of a translation of Vitruvius which he proposed to supplement with a revised text, illustrations and notes. He had completed the translation with the exception of the last four chapters of the tenth book and had discussed with Professor Warren the illustrations intended for the first six books of the work; the notes had not been arranged or completed though many of them were outlined in the manuscript or the intention to insert them indicated. The several books of the translation so far as it was completed had been read to a little group of friends consisting of Professors Sheldon and Kittredge and myself and had received our criticism which had at times been utilized in the revision of the work. After the death of Professor Morgan in spite of my obvious incompetency from a technical point of view I undertook at the request of his family to complete the translation and to see the book through the press. I must therefore assume entire responsibility for the translation of the tenth book beginning with chapter thirteen and further responsibility for necessary changes made by me in the earlier part of the translation, changes which in no case affect any theory held by Professor Morgan but which involve mainly the adoption of simpler forms of statement or the correction of obvious oversights.
