century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories International Handbook on the Economics of Education Geraint Johnes, Jill Johnes, 2007-01-01 is a voluminous and timely collection of 18 essays that addresses a number of core issues on the economics of education An exhaustive survey of the literature on the role of universities as multi product firms at various levels and disciplines identifies the nature of the economies of scope and scale This enriches the volume further Economic Analysis Policy the endeavour of bringing together very knowledgeable contributors including some of the leading contributors to the literature in the UK and beyond to write a handbook on the economics of education is highly appreciated The Handbook contains 18 substantive chapters encapsulated by a brief introduction and an extensive and a very useful index the Handbook should be praised as a useful overview of the field of economics of education as it stands today Ludger W mann Economic Issues This major Handbook comprehensively surveys the rapidly growing field of the economics of education It is unique in that it comprises original contributions on an exceptional range of topics from a review of human capital signalling and screening models to consideration of issues such as educational externalities and economic growth funding models determinants of educational success the educational production function educational standards and efficiency measurement Labour market issues such as the market for teachers and the transition of students from school to work are also explored The International Handbook on the Economics of Education will be warmly welcomed by academic economists educational researchers and practitioners in educational management as well as policymakers Comprising specially commissioned articles the Handbook will become indispensable reference for this ever topical field of study
