

Title - Sugarless yet sweet

Having diabetes is tough

You have to resist sweets

No excuse is good enough

Let it be big portions or big sweets

Galactose is known as the the brain sugar

Life without sweets sucks like having a tumor

Pancreas is angry not secreting enough insulin

But that's fine we'll get through it

Medicine everyday is necessary

Can't leave them our best buddies

Sugar free products are like miracle

A light at the end of the tunnel

A little discipline and strictness for diabetes

Can lead to fitness and is the best remedy

Health is most important for a human being

Let's still enjoy a life that's sugarless yet sweet !

Similes About Diabetes:

Cross-pollinations Gary Paul Nabhan, 2004 A pioneering ethnobotanist Gary Paul Nabhan credits the arts with sparking unlikely scientific breakthroughs and believes that such cross pollination engenders new forms of expression that are essential to discovery In this highly readable book he tells four stories to illustrate this idea In the first coping with color blindness in art class leads to his career as a scientist in the second ancient American Indian songs when translated reveal an understanding of plants and animals that rivals modern research in the third a poem inspires an approach to diabetes using desert plants and in the fourth a coalition of scientists and artists creates the Ironwood Forest National Monument in the Sonoran Desert

The Amazing Language of Medicine Robert B. Taylor, 2017-01-23 This book tells the intriguing and often colorful stories of the medical words we use The origins of clinical and scientific terms can be found in Greek and Latin myths in places such as jungles of Uganda and the islands of the Aegean Sea in the names of medicine's giants such as Hippocrates and Osler and in some truly unlikely sources In this book you will learn the answers to questions such as What disease was named for an American space flight Do you know the echoic word for elephantine rumbling of the bowels What drug name was determined by drawing chemists' notes out of a hat What are surfer's eye clam digger's itch and hide porter's disease This book can give you new insights into the terms we use every day in the clinic hospital and laboratory Knowing a word's history assists in understanding not only what it means but also some of the connotative subtleties of terms used in diagnosis and treatment The Amazing Language of Medicine is intended for the enrichment of physicians other health professionals students and anyone involved in clinical care and medical science

The American Reformer, 1884 **A Study of the Simile in Medicine** Linn John Boyd, 1936 **Argumentation and Language — Linguistic, Cognitive and Discursive Explorations** Steve Oswald, Thierry Herman, Jérôme Jacquin, 2018-03-08 This volume focuses on the role language plays at all levels of the argumentation process It explores the effects that specific linguistic choices may have in the production and the reception of arguments and in doing so it moves beyond the first necessary descriptive stance provided by current literature on the topic Each chapter provides an original take illuminating one or more of the following three issues the range of linguistic resources language users draw on as they argue how cognitive processes of meaning construction may influence argumentative practices and which discursive devices can be used to fulfil a number of argumentative goals The volume includes theoretical and empirical or applied stances providing the reader both with state of the art reflections on the relationship between argumentation and language and with concrete examples of how this relationship plays out in naturally occurring argumentative practices such as classroom interaction and political parliamentary or journalistic discourse This is a very original timely and welcome contribution to the study of argumentation conducted with the tools of the language sciences The collection of papers relevantly tackles key linguistic discursive and cognitive aspects of argumentative practices whose treatment is underrepresented in mainstream argumentation studies by offering new and exciting linguistically grounded theoretical accounts As such the volume testifies both to the vigour of the linguistic current within the discipline and to the high standards of scholarly commitment and quality that the younger generation is pushing forward Without question this book marks an important milestone in the relationships between linguistics and argumentation theory Christian Plantin Professor Emeritus **Adhd Is Not An Illness And Ritalin Is Not A Cure: A Comprehensive Rebuttal Of The (Alleged) Scientific Consensus** Yaakov Ophir, 2022-07-26 Is Attention Deficit Hyperactivity Disorder ADHD the most prevalent neuropsychiatric label in childhood a

valid medical condition Should we really refer to the millions of children diagnosed with ADHD as children who suffer from the diabetes of psychiatry a chronic and harmful biological condition that must be treated regularly with powerful psychoactive substances Building on previous critiques this thorough elegant and mainly courageous book answers these questions through a step by step rebuttal of the scientific consensus about ADHD and its first line treatment with stimulant medications While maintaining scientific rigor this book is written in a clear creative and flowing way using colorful examples some funny some tragic which sweep the reader and inspire social change The book integrates key critiques into one consolidated source uncovers massive evidence against the efficacy and safety of stimulant medications and offers principal solutions to this burning socio educational problem But most importantly this book reviews dozens of reliability and validity gaps in the overriding biomedical consensus It exposes multiple biases and non parsimonious bandages unjustified rationalizations aimed at hiding the scientific holes of the consensus and it redefines ADHD as a non pathological quality mode of thought that has both weaknesses and strengths In this way the book serves as the missing needle required to pierce the over blown theoretical balloon commonly known as ADHD Related Link s **Ten Fac-simile Reproductions Relating to Various Subjects** Samuel Abbott Green,1903 **Indian Science Abstracts** ,2001-04
