tying the articles and recipes together A long time popular culinary instructor in Northern Virginia's Adult Community Education Program Chef Cal is well equipped with recipes that he knew his students and now his readers would rush to make themselves Ramblings contributions of over fifty recipes include traditional Italian delicacies tasty old fashioned comfort dishes soups and casseroles quick and easy desserts and special holiday treats Also included is Chef Cal's interpretation of miniature apple pies Without a doubt his book will be pulled out to create his meals whenever family and friends are gathered Several times as Chef Cal was writing his stories he found that Miss Kitty the gorgeous white cat that lived with the author and his wife during most of this time had something to say So he wrote about that too In some instances he even let Miss Kitty write her own story While the Ramblings of an Old Man is dedicated to the residents both past and current of that wonderful community known as Danbury Forest it also resonates with communities all across America No matter where you live be it a small hamlet a rural town a village or in a big city these stories are for you Some are humorous others sad Some true some imagined They all however tell a story and offer an opportunity to re create the foods that accompanied it So sit back and enjoy The Ramblings of an Old Man

Emmerich, 2020-01-07 Keto meets carnivore in this revolutionary new book by revered cookbook author and low-carb pioneer Maria Emmerich. Did you know that our ancestors were apex predators who were even more carnivorous than hyenas and big cats? That was only about 30,000 years ago. But since then, our diets have drastically changed due to the invention of agriculture about 7,000 years ago, and within the last 100 years or so, the introduction of millions of food additives, the development of a year-round produce supply, and the hybridization of fruits and vegetables making them higher in sugar and lower in nutrients. Carnivore Cookbook explores what our bodies were really designed to digest and gives compelling evidence that we were designed to be primarily meat eaters. In this book, you will learn why all plants come with a downside. Antinutrients are chemicals and compounds that act as natural pesticides or defenses for the plants against being eaten. Maria explains how antinutrients can rob your body of minerals and other nutrients and lead to autoimmune issues and leaky gut. There is even a protocol for healing autoimmune issues called the Carnivore Autoimmune Protocol, a detailed system for stepping you through the various levels of carnivorous eating to find the point where your body responds best and is symptom-free. You will also learn which foods are the highest in nutrient density to help your body heal. Carnivore Cookbook includes more than 100 tasty meat-focused recipes featuring innovative ways to add flavor and variety. There are even carnivore meal plans with grocery lists to make the diet easy to follow.
