Key Features of a Triangular Prism:

- It has a triangular face that remains the same throughout its length (this is called the cross-section).
- The sides of the prism are rectangles.
- Its height is measured at a right angle to the triangular base.

Calculating Volume:

The volume of a triangular prism can be calculated using the formula:

Volume = Area of the base $\times$ Height

or

$$V = A \times h$$

V = Volume

A = the area of the triangular face

h = height
