Cahira's heirs did indeed leave the traditional roles of womanhood to fight for right. Stunned Kathleen realizes she herself bears Cahira's mark. Is Kathleen destined to continue the legacy in the twenty-first century? To discover how the histories of these women relate to her own future, Kathleen must delve deep into the past to learn the truth about The Heirs of Cahira. O'Connor Aidan O'Connor was raised among pickpockets and prostitutes in a Dutch colony on Java, Indonesia. But when a world-famous cartographer discovers her natural artistic talent, she is given a chance to leave her troubled life behind. Disguised as a boy, Aidan joins her benefactor at sea and begins the work of drawing the flora and fauna of the new world. This fresh beginning leads her into adventure and to a great love. But can this love survive the force of Aidan's past and her ambitions for her future?

Chaos, Information, And The Future Of Physics: The Seaman-rossler Dialogue With Information Perspectives By Burgin And Seaman William Seaman, Otto E. Rossler, Mark Burgin, 2023-06-22. The main part of the book consists of the dialogue between physicist Otto Rössler and artist and AI researcher Bill Seaman, with the commentaries disclosing information perspective by information scientist Mark Burgin and Bill Seaman. In this dialogue, Rössler and Seaman discuss concepts surrounding Rössler's major research over his lifetime. Additionally, each research topic is linked to the set of papers and books published by Rössler and other related collaborative researchers. The goal is to delineate an intellectual directory for future researchers. The discussed topics being transdisciplinary in nature, cross many fields in science and technology. A comprehensive historical bibliography is also included. The work explores many fields germane to theoretical science as Rössler was often quite early in developing these fields and interacting with many famous scientists. This work pertains to information theory, which has often been left out of the historical literature. Burgin, as an expert in information theory, is providing an information perspective on this dialogue, adding historical discussion and relevant scientific and mathematical underpinnings of the discussed ideas. His observations are complemented by Seaman, who presents the synthesis of artistic and scientific outlook. Addendum contains articles describing Rössler's relationships to colleagues from multiple fields, a parable by Rössler, and papers related to Rössler's research and theoretical models of processes in the universe.

Roughnecks, Rock Bits and Rigs Bonar Alexander Gow, 2005. This book is a comprehensive study of the evolution of the component aspects of drilling technology in Alberta, from the evolution of power sources and drill bit designs to the composition of drilling muds and the use of fishing tools. Included are explanations of the costs and risks of oil well drilling and of the larger issue of industrial technology: how it evolves and under what conditions. The author draws extensively from original source material, such as interviews, photographs, and appendices from both the Glenbow Archives and the Devon Leduc Petroleum Hall of Fame and Interpretive Centre.
