of scholars Bhabha Chow Niranjana to name but a few explicitly refer to Walter Benjamin's *The Task of the Translator*. In its first part this book considers Benjamin and the way in which he thought about theorized and practiced translation throughout his writings. In a second part Walter Benjamin meets cultural translation tracing various paths of translation and reception; this part also tackles the issues and debates that result from the omnipresence of Walter Benjamin in contemporary theories and discussions of cultural translation. The result is a clearer picture of the translation and reception processes that have generated the immense impact of Benjamin on contemporary cultural theory as well as new perspectives for a way of reading that re-shapes the canonized texts themselves and holds the potential of disturbing, shifting and enriching their more traditional readings.

Introduction to English Syntax Rolf Kreyer, 2010. This book provides an overview of basic syntactic categories

analytical methods and theoretical frameworks that are needed for a comprehensive and systematic description and analysis of the syntax of English as it is spoken and written today. It is therefore useful for students of the English language but also for teachers who are looking for an overview of traditional syntactic analysis. In addition, the book explores various related aspects such as syntactic variation, the relation between syntax and semantics, and psycholinguistic approaches to syntax. One focus throughout is to introduce the reader to the art or science of syntactic argumentation. Almost all of the examples that are found in this book are drawn from language corpora; each syntactic concept therefore is exemplified by authentic language data.

Corpus Based Studies in English Magnus Ljung, 2023-11-27. Corpus based Studies in English contains selected papers from the seventeenth International Conference on English Language Research on Computerized Corpora (ICAME 17). The topics include parsing and annotation of corpora, discourse studies, lexicography, translation studies, parallel corpora, language variation and change, national varieties, methodology, and English language teaching. The papers on parsing and annotation include discussions of the treatment of irregular forms, semantic/pragmatic labels in air traffic control, a comparison of tagging systems, and a presentation of T-tag lexicon construction. The papers on discourse and lexicography include a study of *like* as a discourse marker, thesaural relations, and the lexicalisation of NPs. In translation studies, one paper discusses explicitness as a universal feature of translation, and the paper on parallel corpora contrasts English and Norwegian. Many papers deal with variation and change; here we find discussions of dialogue vs. non-dialogue in modern English fiction and an account of verbal disputes in adolescent English. The historical studies deal with e.g. text type evolution, multi-verb words, normalization in Middle English prose, and modalities in Early Modern English. The methodology papers discuss the use in corpus analysis of inferential statistics, probabilistic approaches to anaphora resolution, and multi-method approaches to data. The ELT paper compares the use of the progressive in native and non-native compositions.
