Abominable Science! Daniel Loxton,Donald R. Prothero,2013-08-06 A sharp analysis of the quest for unreal critters cryptids as they are called and the people who pursue them entertaining and thoroughly documented The Wall Street Journal Throughout our history humans have been captivated by mythic beasts and legendary creatures Tales of Bigfoot the Yeti and the Loch Ness monster are part of our collective experience Now comes a book from two dedicated investigators that explores and elucidates the fascinating world of cryptozoology Daniel Loxton and Donald R Prothero have written an entertaining educational and definitive text on cryptids presenting the arguments both for and against their existence and systematically challenging the pseudoscience that perpetuates their myths After examining the nature of science and pseudoscience and their relation to cryptozoology Loxton and Prothero take on Bigfoot the Yeti or Abominable Snowman and its cross cultural incarnations the Loch Ness monster and its highly publicized sightings the evolution of the Great Sea Serpent and Mokele Mbembe or the Congo dinosaur They conclude with an analysis of the psychology behind the persistent belief in paranormal phenomena identifying the major players in cryptozoology discussing the character of its subculture and considering the challenge it poses to clear and critical thinking in our increasingly complex world As valuable for its analysis of the hunted as it is for the light it shines on the still hopeful hunters Publishers Weekly Highly recommended for readers looking for scientific but accessible evaluations of the existence of five notable cryptids that have captured our imaginations Library Journal starred review *The Business of Martyrdom* Jeffrey W Lewis,2012-04-15 The Business of Martyrdom is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology The Business of Martyrdom argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but

always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have produced a large number of monographs and articles examining suicide bombing The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks Nevertheless nagging inconsistencies and questions remain These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings cultures and devices and directs them toward specific ends Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social cultural and operational constraints throughout its existence Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows The Business of Martyrdom to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon The Crooked Little House Mercy Giuliani, 2015-05-15 Happily married fulfilling career and babies on her mind Mercy was excited about her future At 32 years old life was unfolding exactly as she had envisioned Then overnight her foundation collapsed as one by one she lost her husband career and home Her life as she knew it shattered but then over the next two and a half years it was rebuilt in extraordinary ways Through her short but amazing journey she shares with us her story of great loss followed by three unexpected miracles Mercy maintains an amusing attitude reminding us that even in the most trying times we can still experience joy Her story is also one of faith connecting to intuition and opening her heart and mind to a different life Most importantly she sheds light on a population of children that is being dismissed neglected and mostly forgotten about adolescent foster kids She admits she wasn't aware of the reality of the foster care system until she was thrust into it She shares the intimate details of the system the process to become a foster parent and the remarkable gift of becoming a mother Her story inspires us to stay positive look to the future and open our hearts to our neighbors and communities Archaic images of North Russian folklore and origin of the Indo-Europeans S.V. Zharnikova, The book of outstanding researchers A G Vinogradov and S V Zharnikova is devoted to the study of the ancestral home of the Indo European peoples Indian Iranian Slavic Baltic German Celtic Romance Albanian Armenian and Greek language groups The book is devoted to archaic images of North Russian folklore The book was written in 1989-90 but could not be published in Russia Over the past time additional materials have appeared that confirm the opinion of the authors *Travel Holiday*, 1999-02
