multiple ways gods were conceived characterized and organized Among the names given to the gods many of them refer to spaces cities landscapes sanctuaries houses cosmic elements They reflect mental maps which need to be explored in order to gain new knowledge on both the structure of the pantheons and the human agency in the cultic dimension By considering the intersection between naming and mapping this book opens up new perspectives on how tradition and innovation appropriation and creation play a role in the making of polytheistic and monotheistic religions Far from being confined to sanctuaries in fact gods dwell in human environments in multiple ways They move into imaginary spaces and explore the cosmos By proposing a new and interdisciplinary angle of approach which involves texts images spatial and archaeological data this book sheds light on ritual practices and representations of gods in the whole Mediterranean from Italy to Mesopotamia from Greece to North Africa and Egypt Names and spaces enable to better define differentiate and connect gods *The Report: Morocco 2013* , **Dangerous Sanctuaries** Sarah Kenyon Lischer,2005 Since the early 1990s refugee crises in the Balkans Central Africa the Middle East and West Africa have led to the spread of civil war To understand the role of refugees in the spread of conflict this text systematically compares violent and nonviolent crises involving Afghan Bosnian Rwandan refugees **Local Politics in Jordan and Morocco** Janine A. Clark,2018-04-03 In recent years authoritarian states in the Middle East and North Africa have faced increasing international pressure to decentralize political power Decentralization is presented as a panacea that will foster good governance and civil society helping citizens procure basic services and fight corruption Two of these states Jordan and Morocco are monarchies with elected parliaments and recent experiences of liberalization Morocco began devolving certain responsibilities to municipal councils decades ago while Jordan has consistently followed a path of greater centralization Their experiences test such assumptions about the benefits of localism Janine A Clark examines why Morocco decentralized while Jordan did not and evaluates the impact of their divergent paths ultimately explaining how authoritarian regimes can use decentralization reforms to consolidate power Local Politics in Jordan and Morocco argues that decentralization is a tactic authoritarian regimes employ based on their coalition strategies to expand their base of support and strengthen patron client ties Clark analyzes the opportunities that decentralization presents to local actors to pursue their interests and lays out how municipal level figures find ways to use reforms to their advantage In Morocco decentralization has resulted not in greater political inclusivity or improved services but rather in the entrenchment of pro regime elites in power The main Islamist political party has also taken advantage of these reforms In Jordan decentralization would undermine the networks that benefit elites and their supporters Based on extensive fieldwork Local Politics in Jordan and Morocco is an important contribution to Middle East studies and political science that challenges our understanding of authoritarian regimes survival strategies and resilience *The Report: Algeria 2012* ,2012 *Periodontal Manifestations of Local and Systemic Diseases* George Laskaris,Crispian Scully,2012-12-06 I am delighted to see the appearance of the first comprehensive atlas recognizing the

important relationship between periodontal and systemic health and disease The atlas is not intended to cover the new areas of interest in relation to periodontal health and cardiac and other disease but rather to demonstrate the systemic diseases that manifest to the periodontist and hygienist The atlas thus covers a vast range of systemic disorders that may present with gingival or periodontal lesions and highlights the importance of the periodontal and oral medicine teams in diagnosing and managing patients with sometimes complex medical problems The authors Professor George Laskaris and Professor Crispian Scully are both active clinicians teachers and researchers in oral medicine with wide experience and special interest in the oral medicine periodontal interface and both have published widely in their fields I welcome this contribution to the advancement of care for the patient with periodontal disease Jan Lindhe Professor Emeritus of Periodontology University of Gothenburg Sweden The periodontium is a part of the oral tissues of great interest to dentists and particularly to the periodontal team The importance has now been recognized to extend beyond local disorders to a wide range of conditions that may affect periodontal health

ECAI 2006 Gerhard Brewka, 2006 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there is a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 2006 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS

The Report: Algeria 2013 Oxford Business Group, 2013-11-27 Considerable oil and gas revenues have provided the Algerian government with sufficient funds to embark on generous public spending programmes in nearly all sectors leading to improvements in many of the country's headline indicators Although hydrocarbons are likely to remain the backbone of the economy for the foreseeable future with significant state involvement efforts are being made to diversify the economy and support private sector growth Since the country gained independence more than 50 years ago Algeria's economy has evolved significantly with oil and gas production reinforcing high levels of state spending Algeria has been following something of a contrary approach to much of the rest of the world over the past few years Even as the global economy has struggled Algeria has continued to sail along fairly smoothly It has not seen the vertiginous growth rates of emerging markets elsewhere in the Middle East and Africa but it has seen a steady increase in activity and through prudent management has built up its financial reserves to great effect While the state maintains a heavy presence in the market the 38m person country's fundamentals are very robust and the

capital expenditures and policy reforms being taken to help address its weaknesses offer significant scope for even higher growth in the years to come **THE REPORT Algeria 2018** Oliver Cornock, Algeria is one of the main African producers of hydrocarbons ranking first in gas production and among the top three oil producers The country remains highly dependent on the hydrocarbons sector for the majority of government revenues and almost the entirety of its exports Despite reforms to encourage private sector development promote diversification and attract foreign direct investment in recent years the state still plays a preponderant role meaning that changes to government expenditure and investments continue to have a significant impact on overall economic performance
