Indeed one of the few constant themes of writers chroniclers diarists and commentators from Chaucer to Pepys was the subject of fashion and clothes Whether it was lauding the magnificence of court warning against the vanity of fashion describing the latest modes or decrying the habit of the lower orders to ape the dress of their social superiors people throughout history have been fascinated by the symbolism power and messages that clothes can project Yet despite this contemporary interest clothing as a subject of historical enquiry has been a largely neglected field of academic study Whilst it has been discussed in relation to various disciplines it has not in many cases found a place as a central topic of analysis in its own right The essays presented in this volume form part of a growing recent trend to put fashion and clothing back into the centre ground of historical research From Russia to Rome Ireland to France this volume contains a wealth of examples of the numerous ways clothing was shaped by and helped to shape medieval and early modern European society Furthermore it demonstrates how the study of clothing can illuminate other facets of life and why it deserves to be treated as a central rather than peripheral facet of European history
