Modeling Guidance and Goal Modeling Software Business Michael A. Cusumano, Bala Iyer, N. Venkatraman, 2014-07-08

This book contains the refereed proceedings of the Third International Conference on Software Business ICSOB held in Cambridge MA USA in June 2012. The software business refers to commercial activities in the software industry aimed at generating revenues from the design, delivery and maintenance of software products and IT services to enterprises and individual customers as well as from digital content. Although this business shares common features with other knowledge intensive markets, it carries many inherent features making it a challenging domain for research. The 20 full and 10 short papers accepted for ICSOB were selected from 60 submissions and are organized in sections on software product management, organizational transformation, industry transformation, software platforms and ecosystems, and emerging trends.

Computational Forensics Sargur N. Srihari, Katrin Franke, 2008-08-15. This Lecture Notes in Computer Science LNCS volume contains the papers presented at the Second International Workshop on Computational Forensics IWCF 2008 held August 7-8, 2008. It was a great honor for the organizers to host this scientific event at the renowned National Academy of Sciences Keck Center in Washington DC USA. Computational Forensics is an emerging research domain focusing on the investigation of forensic problems using computational methods. Its primary goal is the discovery and advancement of forensic knowledge involving modeling, computer simulation, and computer based analysis and recognition in studying and solving forensic problems. The Computational Forensics workshop series is intended as a forum for researchers and practitioners in all areas of computational and forensic sciences. This forum discusses current challenges in computer assisted forensic investigations and presents recent progress and advances. IWCF addresses a broad spectrum of forensic disciplines that use computer tools for criminal investigation. This year's edition covers presentations on computational methods for individuality studies, computer based 3D processing and analysis of skulls and human bodies, shoe print preprocessing and analysis, natural language analysis, and information retrieval to support law enforcement analysis, and group visualization of speech recordings, scanner and print device forensics, and computer based questioned document and signature analysis.
