Course description

The 10 day Slickline operations course covers Slickline Operations, Pressure Control, Downhole tools and surface equipment use and limitations. Participants consolidate the classroom theory with practical sessions in a fully equipped workshop.

Knowledge gained is then applied to learn the process of stripping and redressing tools as well as setting up actual cutaways, operated by a surface hand wince, so that the tool operation can be observed. This assists with future "visualization" of tool actions from the surface.

The final stage of learning is carried out using a wireline unit and surface pressure control equipment rigged up to run tools into a completed 1000 ft well. Each participant gets the opportunity to be lead operator for the duration of each planned activity. The use of pressure and flow can be used to create realistic, but safe conditions.
