Tupolev Tu 128 Fiddler:

Tupolev Tu-128 'Fiddler' Alan Dawes, Nikolai Popov, Sergey Burdin, 2014 The first comprehensive account in English of the development and operation of Russia's least known postwar jet fighter. Only ever operated over the former Soviet Union's vast northern territory by an elite group of Soviet Air Force aircrew, it was little known even to most Russian military personnel and the majority of Soviet citizens. Although never flown in anger, the Tu 128 played a hugely important part in protecting the nation's Arctic approaches against foreign incursions for almost a quarter of a century. The reader will discover the rationale behind its selection and training of aircrew, operation of quick reaction alerts, manual and automated ground controlled intercepts and cooperation with the Soviet Union's first AWACS, its stable mate the Tu 126 Moss. With numerous previously unpublished photographs, diagrams and expert text, the Tu 128 Fiddler will prove indispensable to enthusiasts and historians alike. **from jacket cover**

Tupolev TU-22 Sergey Burdin, 2005-11-17 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961. It remained in service until replaced by the much modified Tu 22M Backfire, which was introduced in the early 1970s and still remains in service. It was the first Soviet supersonic bomber and was used for reconnaissance and bombing in the latter role, carrying either conventional or nuclear bombs. The early aircraft had a range of 1,800 miles, but later models had a much increased radius of action through the introduction of in-flight refuelling. This book looks at the design and development of the aircraft up to the introduction of the type M Backfire. Details of construction, weapon systems, photo reconnaissance and jamming equipment are included to cover the several variant models. Operational use is explained, and the text includes many first-hand accounts from Russian aircrew of the period. The book will be superbly illustrated by unique official photographs and manuals. **Super Snoopers** Bob

Archer, 2020-07-21 The US Air Force has performed peripheral reconnaissance adjacent to the traditional foe of Russia: China, North Korea and others for seven decades. Evolving from rudimentary aircraft to an unprecedented level of sophistication, the current elderly airframes boast unmatched performance. The book details the aircraft, equipment, sensors, air bases involved and limited operational details as much remains highly classified. Additionally, stories by the personnel involved who have flown these missions and often faced their quarry at very close range. The majority of aircraft involved are the Boeing C-135 series, including more than 100 different airframes of 48 different versions. Missions include strategic intelligence, airborne command and control, treaty compliance, Open Skies, weather reconnaissance, aerial refuelling and transportation. Details of the different aircraft missions, bewildering programme names, operating locations and flying units involved. Background support organisations are presented. A potted history of every aircraft involved is included, together with units operated and designations applied. Sixty years of operations, which continue to this day, are mostly shrouded in secrecy. A cat and mouse adventure throughout the Cold War into the new peace dividend and now in the face of renewed Russian aggression. The veil of secrecy is lifted ever so slightly. **Monino Museum Moscow** Ken Duffey, 2013-06-19 One of the premier collections of

Soviet and Russian aircraft the Monino museum opened in 1960 and covers an area of about 20 hectares It has on display more than 173 aircraft and 127 aero engines with 44 of its exhibits having been declared as monuments of science and technology The Monino museum charts the history of Soviet and Russian aviation from the earliest pre revolutionary days until the present time with exhibits in the form of models artefacts posters aero engines weapons etc as well as airframes ejection seats rockets covering the later period This book describes and illustrates all the exhibits on display in this amazing museum It serves as a guide for those visiting Monino and a mouth watering taste for those unable to get there in person

South Korean airliners within five years The Su 15 outlasted the Soviet Union the last being retired in 1996 There were also several Sukhoi interceptors that remained in prototype or project form All known versions are described as are operational details The book features many rare and previously unpublished photos Air Force Magazine ,1990 Jane's All the World's Aircraft ,1989 **Jane's World Combat Aircraft** Michael John Haddrick Taylor,1988 Beskriver kampfly og kamphelikoptere fra hele verden A Compendium of Armaments and Military Hardware (Routledge Revivals) Christopher Chant,2014-06-03 First published in 1987 The Compendium of Armaments and Military Hardware provides within a single volume the salient technical and operational details of the most important weapons The complete range of hardware used in land sea and air forces throughout the world at the time of publication is covered from tanks to rocket systems helicopters to cruise missiles alongside full details of size weight and operational range The book s main strength lies in the detail it gives of armament and associated ammunition capabilities and of the sensors and other electronics required for the weapons to be used effectively A key title amongst Routledge reference reissues Christopher Chant s important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide as well as to weapons buffs
