Turing S Cathedral The Origins Of The Digital Universe:

Turing's Cathedral George Dyson, 2012-12-11 A Wall Street Journal Best Business Book of 2012 A Kirkus Reviews Best Book of 2012 In this revealing account of how the digital universe exploded in the aftermath of World War II George Dyson illuminates the nature of digital computers the lives of those who brought them into existence and how code took over the world In the 1940s and 50s a small group of men and women led by John von Neumann gathered in Princeton New Jersey to begin building one of the first computers to realize Alan Turing s vision of a Universal Machine The codes unleashed within this embryonic 5 kilobyte universe less memory than is allocated to displaying a single icon on a computer screen today broke the distinction between numbers that mean things and numbers that do things and our universe would never be the same Turing s Cathedral is the story of how the most constructive and most destructive of twentieth century inventions the digital computer and the hydrogen bomb emerged at the same time *Turing's Cathedral* George Dyson, 2013 In this revealing account of how the digital universe exploded in the aftermath of World War II George Dyson illuminates the nature of digital computers the lives of those who brought them into existence and how code took over the world In the 1940s and 50s a small group of men and women led by John von Neumann gathered in Princeton New Jersey to begin building one of the first computers to realize Alan Turing s vision of a Universal Machine The codes unleashed within the embryonic 5 kilobyte universe less memory than is allocated to displaying a single icon on a computer screen today broke the distinction between numbers that mean things and numbers that do things and our universe would never be the same Turing s Cathedral is the story of how the most constructive and most destructive of twentieth century inventions the digital computer and the hydrogen bomb emerged at the same time Turing's Cathedral George Dyson, 2012 In Turing s Cathedral historian and philosopher of science George Dyson vividly recreates the scenes of focused experimentation incredible mathematical insight and pure creative genius that gave us computers television modern genetics and models of stellar evolution

Autographic Design Dietmar Offenhuber, 2023-12-19 An ambitious vision for design based on the premise that data is material not abstract Data analysis and visualization are crucial tools in today s society and digital representations have steadily become the default Yet more and more often we find that citizen scientists environmental activists and forensic amateurs are using analog methods to present evidence of pollution climate change and the spread of disinformation In this illuminating book Dietmar Offenhuber presents a model for these practices a model to make data generation accountable autographic design Autographic refers to the notion that every event inscribes itself in countless ways Think of a sundial for example a perfectly autographic device that displays information on itself Inspired by such post digital practices of visualization and evidence construction Offenhuber describes an approach to visualization based on the premise that data is a material entity rather than an abstract representation Emerson wrote Every act of the man inscribes itself in the memories of his fellows and in his own manners and face In Autographic Design Offenhuber introduces a model for design that

emphasizes traces imprints and self inscriptions turning them into sensory displays In an age where misinformation is harder and harder to identify Autographic Design makes an urgent and persuasive case for a different approach that calls attention to the production of data and its connection to the material world

The Rise of the Robots Martin Ford,2015-09-03 Intelligent algorithms are already well on their way to making white collar jobs obsolete travel agents data analysts and paralegals are currently in the firing line In the near future doctors taxi drivers and ironically even computer programmers are poised to be replaced by robots Without a radical reassessment of our economic and political structures we risk the very implosion of the capitalist economy itself In *The Rise of the Robots* technology expert Martin Ford systematically outlines the achievements of artificial intelligence and uses a wealth of economic data to illustrate the terrifying societal implications From health and education to finance and technology his warning is stark all jobs that are on some level routine are likely to eventually be automated resulting in the death of traditional careers and a hollowed out middle class The robots are coming and we have to decide now whether the future will bring prosperity or catastrophe

The Coevolution Edward Ashford Lee,2020-04-21 Should digital technology be viewed as a new life form sharing our ecosystem and coevolving with us Are humans defining technology or is technology defining humans In this book Edward Ashford Lee considers the case that we are less in control of the trajectory of technology than we think It shapes us as much as we shape it and it may be more defensible to think of technology as the result of a Darwinian coevolution than the result of top down intelligent design Richard Dawkins famously said that a chicken is an egg's way of making another egg Is a human a computer's way of making another computer To understand this question requires a deep dive into how evolution works how humans are different from computers and how the way technology develops resembles the emergence of a new life form on our planet Lee presents the case for considering digital beings to be living then offers counterarguments What we humans do with our minds is more than computation and what digital systems do be teleported at the speed of light backed up and restored may never be possible for humans To believe that we are simply computations he argues is a dataist faith and scientifically indefensible Digital beings depend on humans and humans depend on digital beings More likely than a planetary wipe out of humanity is an ongoing symbiotic coevolution of culture and technology

The Pentagon's Brain Annie Jacobsen,2015-09-15 Discover the definitive history of DARPA the Defense Advanced Research Project Agency in this Pulitzer Prize finalist from the author of the New York Times bestseller *Area 51* No one has ever written the history of the Defense Department's most secret most powerful and most controversial military science R D agency In the first ever history about the organization New York Times bestselling author Annie Jacobsen draws on inside sources exclusive interviews private documents and declassified memos to paint a picture of DARPA or the Pentagon's brain from its Cold War inception in 1958 to the present This is the book on DARPA a compelling narrative about this clandestine intersection of science and the American military and the often frightening results

The Science of Computing Matti Tedre,2014-12-03 The identity of computing has been fiercely

debated throughout its short history Why is it still so hard to define computing as an academic discipline Is computing a scientific mathematical or engineering discipline By describing the mathematical engineering and scientific traditions of computing *The Science of Computing Shaping a Discipline* **The Climate Demon** R. Saravanan, 2021-10-21 An introduction to the complex world of climate models that explains why we should trust their predictions despite the uncertainties

Journey to the Edge of Reason Stephen Budiansky, 2021 A remarkable account of the brilliant troubled mathematician and philosopher Kurt G del From his famous Incompleteness Theorem which shook the foundations of mathematical truth to his perilous escape from Nazi Vienna this book weaves together his creative genius mental illness and idealism in the face of adversity **Portable Moving Images** Ricardo Cedeño Montaña, 2017-08-21 This media history explores a series of portable small cameras playback devices and storage units that have made the production of film and video available to everyone Covering several storage formats from 8mm films of the 1900s through the analogue videotapes of the 1970s to the compression algorithms of the 2000s this work examines the effects that the shrinkage of complex machines media formats and processing operations has had on the dissemination of moving images Using an archaeological approach to technical standards of media the author provides a genealogy of portable storage formats for film analog video and digitally encoded video This book is a step forward in decoding the storage media formats which up to now have been the domain of highly specialised technicians *The Pursuit of Happiness in a More Perfect Union* Robert G. Bill, 2016-11-07 The conflict between conservatives and liberals over public economic policy appears to have become a permanent feature of the American political landscape Conservatives seek economic solutions with the market as virtually the sole organizing economic principle invoking individualism inspired by the Declaration of Independences right to the pursuit of happiness Liberals look to an important economic role for a federal government established by the Constitution to promote the general welfare In addition to the disagreement among the political class there is also no agreement among economists with no model reliably predicting the economic crises of recent decades Under these circumstances the author believes individualism and the concern for the common good may only be reconciled through policies which promote equality of opportunity or as Abraham Lincoln expressed it equal privileges in the race of life with all its desirable human aspirations The reconciliation of individualism and the common good is developed through reviews of the meaning of liberty happiness and their economic implications The historical performance of the American economy is described in the context of the evolution of American federal government from one of limited economic scope supporting laissez faire capitalism to the current mixed government The more expansive role of government is described in terms of taxation policy and spending including concerns over the national debt and its significance With this background the general reader is invited to follow the authors path to a policy of equality of opportunity with specific proposals for an end to poverty assistance to children assistance to postsecondary education and training and commitments to social and medical security A specific taxation policy is proposed to fund these programs while

maintaining a prudent and manageable national debt Associated with these proposals are reforms to make the federal government more representative of the people **The Bomb and America's Missile Age** Christopher Gainor,2018-10-15 How nuclear weapons helped drive the United States into the missile age The intercontinental ballistic missile ICBM designed to quickly deliver thermonuclear weapons to distant targets was the central weapons system of the Cold War ICBMs also carried the first astronauts and cosmonauts into orbit More than a generation later we are still living with the political technological and scientific effects of the space race while nuclear armed ICBMs remain on alert and in the headlines around the world In *The Bomb and America's Missile Age* Christopher Gainor explores the US Air Force's USAF decision in March 1954 to build the Atlas America's first ICBM Beginning with the story of the guided missiles that were created before and during World War II Gainor describes how the early Soviet and American rocket programs evolved over the course of the following decade He argues that the USAF was wrongly criticized for unduly delaying the start of its ICBM program endangering national security and causing America embarrassment when a Soviet ICBM successfully put Sputnik into orbit ahead of any American satellite Shedding fresh light on the roots of America's space program and the development of US strategic forces *The Bomb and America's Missile Age* uses evidence uncovered in the past few decades to set the creation of the Atlas ICBM in its true context not only in the America of the postwar years but also in comparison with the real story of the Soviet missiles that propelled the space race and the Cold War Aimed at readers interested in the history of the Cold War and of space exploration the book makes a major contribution to the history of rocket development and the nuclear age [Handbook of Futures Studies](#) Roberto Poli,2024-07-05 This insightful Handbook emphasizes the unique contribution that Futures Studies offers when understanding and managing current situations Contributing authors argue that by learning to examine the future in the present individuals and organizations can expand their abilities to analyze assess and ultimately make better decisions This title contains one or more Open Access chapters **Wandering Towards a Goal** Anthony Aguirre,Brendan Foster,Zeeya Merali,2018-05-30 This collection of prize winning essays addresses the controversial question of how meaning and goals can emerge in a physical world governed by mathematical laws What are the prerequisites for a system to have goals What makes a physical process into a signal Does eliminating the homunculus solve the problem The three first prize winners Larissa Albantakis Carlo Rovelli and Jochen Szangolies tackle exactly these challenges while many other aspects agency the role of the observer causality versus teleology ghosts in the machine etc feature in the other award winning contributions All contributions are accessible to non specialists These seventeen stimulating and often entertaining essays are enhanced versions of the prize winning entries to the FQXi essay competition in 2017 The Foundational Questions Institute FQXi catalyzes supports and disseminates research on questions at the foundations of physics and cosmology particularly new frontiers and innovative ideas integral to a deep understanding of reality but unlikely to be supported by conventional funding sources *Modern Humans* John F. Hoeffcker,2017-10-31

Modern Humans is a vivid account of the most recent and perhaps the most important phase of human evolution the appearance of anatomically modern people Homo sapiens in Africa less than half a million years ago and their later spread throughout the world Leaving no stone unturned John F Hoffecker demonstrates that Homo sapiens represents a major transition in the evolution of living systems in terms of fundamental changes in the role of non genetic information Modern Humans synthesizes recent findings from genetics including the rapidly growing body of ancient DNA the human fossil record and archaeology relating to the African origin and global dispersal of anatomically modern people Hoffecker places humans in the broad context of the evolution of life emphasizing the critical role of genetic and non genetic forms of information in living systems as well as how changes in the storage transmission and translation of information underlie major transitions in evolution He also draws on information and complexity theory to explain the emergence of Homo sapiens in Africa several hundred thousand years ago and the rapid and unprecedented spread of our species into a variety of environments in Australia and Eurasia including the Arctic and Beringia beginning between 75 000 and 60 000 years ago This magisterial work will appeal to all with an interest in the ever fascinating field of human evolution

Undisciplining Knowledge Harvey J. Graff, 2015-08-01 The first critical history of interdisciplinary efforts and movements in the modern university Interdisciplinarity or the interrelationships among distinct fields disciplines or branches of knowledge in pursuit of new answers to pressing problems is one of the most contested topics in higher education today Some see it as a way to break down the silos of academic departments and foster creative interchange while others view it as a destructive force that will diminish academic quality and destroy the university as we know it In Undisciplining Knowledge acclaimed scholar Harvey J Graff presents readers with the first comparative and critical history of interdisciplinary initiatives in the modern university Arranged chronologically the book tells the engaging story of how various academic fields both embraced and fought off efforts to share knowledge with other scholars It is a story of myths exaggerations and misunderstandings on all sides Touching on a wide variety of disciplines including genetic biology sociology the humanities communications social relations operations research cognitive science materials science nanotechnology cultural studies literacy studies and biosciences the book examines the ideals theories and practices of interdisciplinarity through comparative case studies Graff interweaves this narrative with a social institutional and intellectual history of interdisciplinary efforts over the 140 years of the modern university focusing on both its implementation and evolution while exploring substantial differences in definitions goals institutional locations and modes of organization across different areas of focus Scholars across the disciplines specialists in higher education administrators and interested readers will find the book s multiple perspectives and practical advice on building and operating and avoiding fallacies and errors in interdisciplinary research and education invaluable

Exceptional Creativity in Science and Technology Andrew Robinson, 2013-02-22 In the evolution of science and technology laws governing exceptional creativity and innovation have yet to be discovered In his influential study The

Structure of Scientific Revolutions the historian Thomas Kuhn noted that the final stage in a scientific breakthrough such as Albert Einstein's theory of relativity the most crucial step was inscrutable The same is still true half a century later Yet there has been considerable progress in understanding many stages and facets of exceptional creativity and innovation In Exceptional Creativity in Science and Technology editor Andrew Robinson gathers diverse contributors to explore this progress This new collection arises from a symposium with the same title held at the Institute for Advanced Study IAS in Princeton Organized by the John Templeton Foundation the symposium had the late distinguished doctor and geneticist Baruch S Blumberg as its chair At the same time its IAS host was the well known physicist Freeman J Dyson both of whom have contributed chapters to the book In addition to scientists engineers and an inventor the book's fifteen contributors include an economist entrepreneurs historians and sociologists all working at leading institutions including Bell Laboratories Microsoft Research Oxford University Princeton University and Stanford University Each contributor brings a unique perspective to the relationships between exceptional scientific creativity and innovation by individuals and institutions The diverse list of disciplines covered the high profile contributors including two Nobel laureates and their fascinating insights into this overarching question how exactly do we make breakthroughs will make this collection of interest to anyone involved with the creative process in any context Still it will especially appeal to readers in scientific and technological fields

In/visible War Jon Simons, John Louis Lucaites, 2017-06-14 In *Visible War* addresses a paradox of twenty first century American warfare The contemporary visual American experience of war is ubiquitous and yet war is simultaneously invisible or absent we lack a lived sense that America is at war This paradox of invisibility concerns the gap between the experiences of war zones and the visual mediated experience of war in public popular culture which absents and renders invisible the former Large portions of the domestic public experience war only at a distance For these citizens war seems abstract or may even seem to have disappeared altogether due to a relative absence of visual images of casualties Perhaps even more significantly wars can be fought without sacrifice by the vast majority of Americans Yet the normalization of twenty first century war also renders it highly visible War is made visible through popular commercial mediated culture The spectacle of war occupies the contemporary public sphere in the forms of celebrations at athletic events and in films video games and other media coming together as MIME the Military Industrial Media Entertainment Network *Kenneth Burke's Weed Garden* Kyle Jensen, 2022-06-29 Since its publication in 1950 Kenneth Burke's *A Rhetoric of Motives* has been one of the most influential texts of theory and criticism Critics have discovered in its pages concepts that reveal new dimensions of human motivation And yet despite its obvious genius critics have interpreted *A Rhetoric of Motives* as a collection of provocations rather than a systematic treatment of rhetoric In this book Kyle Jensen argues that the coherence in Burke's thought has yet to be fully appreciated Drawing on unpublished drafts and voluminous correspondence he reconstructs Burke's drafting and revision process for *A Rhetoric of Motives* as well as its recently discovered second volume *The War of Words* Jensen's

extensive archival analysis reveals that Burke relied on the concept of myth to draw together the loose ends in his argument. For Burke all general theories of rhetoric are formed and structured using mythic images and terms. By exploring what Burke added and omitted and by putting his writing process into the context of daily life after the Second World War including Burke's attempts to clear the weeds from his Andover farm, Jensen sheds new light on the key problems that Burke encountered and the methods he used to overcome them. Kenneth Burke's *Weed Garden* is essential for those who study Burke and the tradition of modern rhetoric that he helped found.
