

MODEL WLC100 SOLDERING STATION

PRODUCT DESCRIPTION

The Weller® WLC100 Soldering Station offers adjustable temperature hand soldering. The tip temperature can be adjusted by varying the power level of the heater. The power can be adjusted anywhere from 5 watts up to 40 watts with a knob on the base unit. The WLC100 also provides a built-in iron stand and tip cleaning sponge.

A selection of iron plated tips from a 1/32" conical to a 3/16" screw-driver tip are available. The WLC100 is supplied with an ST3 1/8" screwdriver tip. Refer to the tip table for other styles available. The WLC100 is U.L. listed.

WLC100 OPERATING INSTRUCTIONS

Unpack the unit carefully. Place tool holder in slot provided in top of unit. Wet sponge. Distilled water is preferred, especially in areas where tap water has a high mineral content. Insert tool into holder.

Insert line cord plug into 120 volt A.C. receptacle. Turn on unit with rocker switch. Set power control knob to "5" to heat tool up quickly. Wait 1 minute. Lower settings take longer to reach operating temperature. Adjust control to a lower setting. Remove tool from holder and tin tip with solder. Unit is now ready for use. Always use the lowest power setting that will handle the load you are soldering. By using lower settings and properly selecting tip styles, sensitive components will be protected from heat damage.

TIPS ON SOLDERING

Soldering is the fastest and easiest way to join metals. The solder, usually an alloy of tin and lead, has a low melting point and is run into the joint, using the parts together. A soldered joint is stable and electrically efficient. However, it is not capable of taking a lot of stress or movement. To make a soldered joint, you need: 1) a source of heat, 2) CLEAN metal surfaces to be joined, 3) a suitable grade of solder, 4) flux - Rosin core solder is what you need for the majority of jobs. It means that you don't have to bother about separate flux. Rosin core solder must be used for any electrical connection. Now here is what you have to do.

1. Ensure that items to be soldered are perfectly clean. This can be achieved with wire wool or fine emery cloth. Just because a piece of metal looks bright and clean it may not be.
2. Make a good mechanical connection by wrapping wires around each other or around a terminal.
3. When applying heat, do not apply it to the solder. Heat the base material, e.g. wires so they become sufficiently hot to melt the solder and flow it into the joint. A small amount of fresh solder on the tip when you begin soldering will help to carry heat from the iron to the joint.
4. When solder has been applied to a joint smoothly slide the iron away to leave the joint neat.
5. Avoid moving joint or wire after removing iron. Blowing on the joint will speed cooling.
6. On electrical and electronic components avoid too much heat. A heat sink can be used to dissipate heat away from the component.
7. Don't apply more solder than needed. Excess solder can cause short circuits.
8. It is advisable to pre tin components before soldering, especially stranded wire. Twist the strands together, then heat and saturate with solder.
9. Sweating a joint is easy after tinning. Just twist wires together and apply heat.
10. To desolder a joint apply heat and use a soldering aid like solder wick to remove solder and separate joint. Be sure to use new solder when re-soldering.
11. Fumes from some fluxes can be unpleasant so be sure there is good ventilation in the work area.
12. Don't use a file to clean soldering tip, wiping on a wet sponge when tip is hot should keep tip clean.

Weller Wlc100 Manual:

Electronics Now, 1999 *Wiring Projects for Your Model Railroad* Larry Puckett, 2018-08-01 Written by Model Railroader s DCC Corner columnist Larry Puckett this all new book focuses on wiring various accessories and devices on your model railroad in contrast to wiring related to train control Sixteen projects are featured including Lighting structure interiors signs and scenes Installing working crossing gates and flashers Adding interlocking signals and wiring Controlling turntables and building control panels And much more Whether you re a beginner or experienced modeler *Wiring Projects for Your Model Railroad* will be your go to source for bringing your layout structures and accessories to life Nuts & Volts, 2005 **CQ**, 2000

Enjoying the Melody of Term: An Psychological Symphony within **Weller Wlc100 Manual**

In some sort of used by displays and the ceaseless chatter of instantaneous connection, the melodic elegance and mental symphony produced by the prepared term frequently disappear in to the backdrop, eclipsed by the relentless sound and interruptions that permeate our lives. However, located within the pages of **Weller Wlc100 Manual** a marvelous fictional treasure filled with raw emotions, lies an immersive symphony waiting to be embraced. Crafted by an outstanding musician of language, that interesting masterpiece conducts readers on a psychological journey, well unraveling the hidden tunes and profound influence resonating within each cautiously constructed phrase. Within the depths of the touching examination, we can examine the book is main harmonies, analyze their enthralling publishing model, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
