Induced Pluripotent Stem Cells

Sibel Yildirim,2012-02-02 Induced Pluripotent Stem iPS cells are mature cells that have been genetically reprogrammed so that they return to their embryonic state It is not yet known if iPS stem cells and embryonic stem cells differ significantly Today many fundamental belief systems in biology are shifting towards accepting that mature body cells can be reverted to an embryonic state without the help of eggs or embryos With their changed identities iPS cells are then ready to serve as new tools for research in the fields of disease pathogenesis drug discovery oncology and cell transplantation One example of this would be using iPS from a patient s mature cells to repair damaged tissue it is thought that there would be very low incidence of rejection of the new tissue in these cases For the last four years this therapeutic promise has been studied by hundreds of researchers worldwide in an effort to understand the ability of these cells to reverse their biological clocks

Family Communication about Genetics Clara L. Gaff,Carma L. Bylund,2010 Genetics is in all senses a family affair The diagnosis of a genetic condition affects not only the patient and biological family members who may themselves be at risk but also family more generally as support may be sought from those considered kin and who may or may not be at risk themselves It is considered best practice in genetic consultations to explore who will be informed within the family when a genetic condition or risk is diagnosed particularly when the health of other family members is at risk There is little guidance or consensus on how to achieve the implicit goal of informed family members while respecting patient confidentiality however There is a need for practitioners to be aware of the dynamics of family communication and to have guidance about how they may sensitively facilitate communication about genetics within families This handbook facilitates the development of clinical practices relating to family communication about genetics Relevant theories of family communication are summarized and related to a clinical genetics milieu and from this frameworks for practitioners are presented A book of this nature is particularly timely as the completion of the Human Genome Project will result in an unprecedented amount of information about genetic constitution and health risks becoming available to individuals and their families The presence of a potentially genetic condition in a family is not a new phenomenon However the growth in testing for genetic conditions common complex conditions and variants that may influence health as well as drug metabolism means that a greater number of individuals will face decisions about communicating this information to their relatives Many health professionals in all levels of health care will be confronted with issues of responsibility and practice in family communication about genetic information as they become providers of this testing

American Liturgy

James Calvin Davis,2021-02-08 How can

celebrating the holy days of American culture help us to understand what it means to be both Christian and American In timely essays on Super Bowl Sunday Mother s Day Independence Day Thanksgiving and other holidays of the secular calendar James Calvin Davis explores the wisdom that Christian tradition brings to our sense of American identity as well as the ways in which American culture might prompt us to discern the imperatives of faith in new ways Rather than demonizing culture or naively baptizing it Davis models a bidirectional mode of reflection where faith convictions and cultural values converse with and critique one another Focusing on topics like politics race parenting music and sports these essays remind us that culture is as much human accomplishment and gift as it is a challenge to Christian values and there is insight to be discovered in a theologically astute investment in America s holy days

[The Treadmills of Time](#) Richard John Kosciejew,2014-10-16 If the universe is a seamlessly interactive system that evolves to an assigning of some levelling plexuity and that the lawful regularities of this universe are emergent properties of this system we can legibly assume that the cosmos as a legitimate point of singularity as an undivided totality in the contributions for making of its whole In that for evincing to the progressive principal order of complementarity as placed within the intertwining relations within its given parts Minded that this collective and undivided whole exists in some sense within all contributions of its parts then one can declare positively or firmly maintain that it operates in self reflective fashion and is the evidence for all emergent plexuities Since human consciousness evinces self reflective awareness in the human brain and since this brain is equivalently matched to all physical phenomena as this can be viewed as an emergent property in the possessive nature of
